The World Revolution of Westernization Cliffs Notes

[The book] is intended to meet the need for a text to accompany the Advanced Placement

Spanish Lanugae course. The overall goal ... is to prepare students to perform at a high level of proficiency in the four basic language skills: listening, speaking, reading and writing. Upon completing the course, students are expected to be able to comprehend formal and informal Spanish, and also speak, read and write cohesively and precisely at the third-year college level. [The authors] have attempted to create a series of exercises that will both meet the general objectives of the course and help the students prepare for the Advanced Placement examination ... Although geared primarily to the AP course and examination, the book is also intended to

provide an opportunity for advanced learning. The exercises are designed not only to review and reinforce students' knowledge, but also to increase their vocabulary and sharpen their grammatical skills. [The book] can be used as a complementary text in any advanced course in Spanish.-

Social Justice in Action

Princeton Review
Addressing both veterans of justice work and novices seeking points of entry, the essays in this volume showcase practical approaches to diversity, equity, and inclusion: ways to build community, earn trust, tell unheard stories, and develop solutions to problems.

Emphasizing values such as empathy, self-reflection, and integrity, the volume is rooted in humanities work but also features contributions from fields as diverse as the performing arts, architecture, and evolutionary biology and represents settings

beyond the college campus, such as schools, libraries, museums, and prisons. While bringing insights from higher education, it critiques the system as well, exploring the ways that institutions reinforce power structures and exclude marginalized voices. Interspersed with the essays, brief reflections by activists and artists offer testimony and inspiration.

The Princeton Review

The agriculture, forestry, and fishing sectors are the cornerstone of industries that produce food, fiber, and biofuel. The National Institute for Occupational Safety and Health (NIOSH) conducts research in order to improve worker safety and health in these sectors. This National Research Council book reviews the NIOSH Agriculture,

Forestry, and Fishing Program to evaluate the 1) relevance of its work to improvements in occupational safety and health and 2) the impact of research in reducing workplace illnesses and injuries. The assessment reveals that the program has made meaningful contributions to improving worker safety and health in these fields. To enhance the relevance and impact of its work and fulfill its mission, the NIOSH Agriculture, Forestry, and Fishing Program should provide national leadership, coordination of research, and activities to transfer findings, technologies, and information into practice. The program will also benefit from

establishing strategic goals and implementing a comprehensive surveillance system in order to better identify and track worker populations at risk.
