The problem was that the Newton Fire/EMS Department had no formalized procedure for completing initial damage assessment activities following community-wide disasters, which produced fragmented and disorganized initial emergency response. The purpose of this research was to develop a

damage assessment policy to guide the activities of emergency responders immediately following a community-wide disaster. Industry best practices were investigated, and other public safety agencies' perceptions of damage assessment activities were explored. Additionally, Newton Fire/EMS members reported their perceptions of the importance and desired outcomes of damage assessment performance. Finally, a model Standard Operating Guideline was constructed in an effort to employ research results to guide the activities of emergency responders arriving at the scene of community-wide disasters. Action research was used to complete this research project. An internal survey of Newton Fire/EMS employees was conducted, as was an external survey of members of the International Association of Fire Chiefs Executive Fire Officer Section in an effort to gather information regarding damage assessments. A model SOG was created, and a comprehensive literature review was conducted. The research revealed that most emergency responders understood the importance of conducting initial damage assessments during community-wide disasters, and that rapid windshield surveys by first-arriving firefighters were usually the most important method. This research supports the creation of a Damage Assessment SOG for use by members of the Newton Fire/EMS Department.

Emergency medical service represents more than 80 per cent of the response activity in emergency response agencies. The whole concept of EMS has undergone drastic changes and improvements over the past three decades. With the ongoing threat of deadly diseases, the methods once practiced to treat trauma victims are not necessarily the best, or safest, procedures. In this day and age, change is the only constant. This book is

designed to improve the quality of your EMS delivery.

Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at

an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.

Leadership skills save lives. Become the exceptional firefighter and leader that your community can count on! A good fire officer can read smoke, understand building construction, and fight fires. Exceptional leadership, though, means going above and beyond what is required to answer the call of duty. In the fire service, it can be the difference between survival or disaster. Leadership qualities can advance your career and develop you into the firefighter and exceptional leader that your fire department, crew, and the community can count on. In *Leadership Refined by Fire*, John M. Cuomo leverages over two decades as a firefighter to help you become the fire service leader you are seeking to be. This guide will teach you: A step-by-step game plan to develop and improve leadership skills, based on inspirational leaders throughout history. Key practices for self-care during a tough job. How to practice effective

leadership in times of chaos. Methods to empathetically care for people in crisis, both on emergency scenes and in the firehouse. How to deliver exceptional customer service. Tips for building a motivational culture while coaching the next generation of firefighters. Effective leadership is the backbone for safety- and success-in the unpredictable and dangerous fire service. Deeply personal and backed with raw, real-life experiences, *Leadership Refined by Fire* is a how-to guide you can use to become the leader you are seeking to be-start

your journey today.
