Improving Agricultural Extension Galgotia Publications

This text has been fully revised to reflect the latest software engineering practice. It includes material on e-commerce, Java, UML, while a new chapter on web engineering addresses formulating, analysing and testing web-based applications.

E-voting Handbook Springer Science & Business Media

This textbook gives a hands-on, practical approach to system analysis and design within the framework of the systems development life cycle. The fifth edition now includes an additional CD-ROM.

Multimedia Database Management Systems McGraw-Hill Science, Engineering & Mathematics

"The theme of The World Development Report 2007 is youth - young people between the ages of 12 to 24. As this population group seeks identity and independence, they make decisions that affect not only their own well-being, but that of others, and they do this in a rapidly changing demographic and socio-economic environment. Supporting young people's transition to adulthood poses important opportunities and risky challenges for development policy. Are education systems preparing young people to cope with the demands of changing economies? What kind of support do they

get as they enter the labor market? Can they move freely to where the jobs are? What can be done to help them avoid serious consequences of risky behavior, such as death from HIV-AIDS and drug abuse? Can their creative energy be directed productively to support development thinking? The report will focus on crucial capabilities and transitions in a young person's life: learning for life and work, staying healthy, working, forming families, and exercising citizenship. For each, there are opportunities and risks; for all, policies and institutions matter."

Dissipative Processes in Tribology Stockholm : International Institute for Democracy and Electoral Assistance

This book offers a simple introduction to the theory and practice of the Analytic Hierarchy Process (AHP) without a pre-requisite for a sophisticated mathematical background. AHP is an intuitive and mathematically simple methodology in the field of multi-criteria decision making in Operational Research (OR). Using Super Decisions v3, the newly developed software by the Creative Decisions Foundations, this book provides a quick and intuitive understanding of AHP using spreadsheet examples and step-by-step software instructions. Super Decisions v3 marks a drastic departure from the previous version 2 in terms of interface and ratings model development. In addition to a concise guide, instructional videos are also available to demonstrate how to use the different features of Super Decisions v3. Most AHP books assume the reader has basic OR mathematical background; however, AHP was developed with the goal that decision makers can take advantage of this methodology without struggling with the mathematics behind it. For this reason, only basic arithmetic knowledge is required from the readers. In conclusion, this book delivers a quick and practical understanding of the AHP methodology that can be useful for corporate executives and decision-makers in all fields.

A Textbook of Jurisprudence Independently Published

This book on Improving Agricultural Extension: a Reference Manual offers a critical review and inventory-analysis of the "State of the Art" in agricultural extension theory and best practices written by internationally known agricultural extension practitioners, educators and scholars. A total of 38 authors from 15 countries contributed to the 23 chapters of this book and thus they provided broad international perspectives, covering both theory and practice, as well as micro and macro issues related to agricultural extension. It is the third edition of a classic reference manual on agricultural extension published by the Food and Agriculture Organization (FAO) of the United Nations. Aimed at agricultural extension planners, managers, trainers, educators, and field practitioners, this book could be useful in improving the quality of agricultural extension and in generating new ideas and methods for increasing further the cost-effectiveness of agricultural extension programmes. It provides many sound and practical suggestions for developing and improving the conceptual, technical, and operational methods and tools in order to strategically plan, efficiently manage, and scientifically evaluate a problem-solving, demand-driven and needs-based agricultural extension programmes.

Voting from Abroad Simon and Schuster

Civic and citizenship education have emerged as major areas of discussion, debate and action regarding their place in the school curriculum in many nations. This text sets out to show the importance of citizenship education with examples and contributions from around the world.

Analysis for Applied Mathematics Pantheon

Democracy for Sale is an on-the-ground account of Indonesian democracy, analyzing its election campaigns and behind-the-scenes machinations. Edward Aspinall and Ward Berenschot assess the informal networks and political strategies that shape access to power and privilege in the messy political environment of contemporary Indonesia. In post-Suharto Indonesian politics the exchange of patronage for political support is commonplace. Clientelism, argue the authors, saturates the political system, and in Democracy for Sale they reveal the everyday practices of vote buying, influence peddling, manipulating government programs, and skimming money from government projects. In doing so, Aspinall and Berenschot advance three major arguments. The first argument points toward the role of religion, kinship, and other identities in Indonesian clientelism. The second explains how and why Indonesia's distinctive system of free-wheeling clientelism came into being. And the third argument addresses variation in the patterns and intensity of clientelism. Through these arguments and with comparative leverage from political practices in India and Argentina, Democracy for Sale provides compelling evidence of the importance of informal networks and relationships rather than formal parties and institutions in contemporary Indonesia.

Tafsiran Budaya Agate Pub Incorporated

This study presents the contemporary Islamic resurgence movement among young people in Bandung Indonesia, focusing on its emergence, development and routinisation. It traces various factors and conditions that contributed to the emergence of the movement. It also tries to explain how and why young people (students in particular) turn to Islam, and how the movement is organised and developed among students. Finally, it examines internal changes among various Islamic groups as responses to social, political and cultural changes.

Introducing Electronic Voting Routledge

When the Indonesian New Order regime fell in 1998, regional politics with strong ethnic content emerged across the country. In West Kalimantan the predominant feature was particularly that of the Dayaks. This surge, however, was not unprecedented. After centuries of occupying a subordinate place in the political and social hierarchy under the nominal rule of the Malay sultanates, Dayaks became involved in an enthusiastic political emancipation movement from 1945. The Dayaks secured the governorship as well as the majority of the regional executive head positions before they were shunned by the New Order regime. This book examines the development of Dayak politics in West Kalimantan from the colonial times until the first decade of the 21st century. It asks how and why Dayak politics has experienced drastic changes since 1945. It will look at the effect of regime change, the role of the individual leaders and organizations, the experience of marginalization, and conflicts on the course of Dayaks politics. It will also examine ethnic relations and recent political development up to 2010 in the province.

Practical Decision Making using Super Decisions v3 Psychology Press

Integrates the theory and practices of supply chain management. This book focuses on how to build a competitive supply chain using viable management strategies, operational models, decision-making techniques, and information technology. It also includes initiatives such as e-commerce, collaborative planning, forecasting, and replenishment (CPFR).

Citizenship for the 21st Century Springer Science & Business Media

This well-written book contains the analytical tools, concepts, and viewpoints needed for modern applied mathematics. It treats various practical methods for solving problems such as differential equations, boundary value problems, and integral equations. Pragmatic approaches to difficult equations are presented, including the Galerkin method, the method of iteration, Newton's method, projection techniques, and homotopy methods.

The Machinery of Democracy Earthscan

Updated in its 3rd edition, Basic Methods of Policy Analysis and Planning presents quickly applied methods for analyzing and resolving planning and policy issues at state, regional, and urban levels. Divided into two parts, Methods which presents quick methods in nine chapters and is organized around the steps in the policy analysis process, and Cases which presents seven policy cases, ranging in degree of complexity, the text provides

Supply Chain Management International Institute for Democracy and Electoral Assistance (International IDEA)

The sixth edition of Professional Meeting Management is the newest edition of the longtime standard reference and textbook for the meetings industry and meetings education. This is the first student and meeting professionals textbook aligned with the new Certified Meeting Professional (CMP) International Standards, which will be used by the Convention Industry Council as a reference book for item writing for the CMP Certification Examination. It includes the most up-to-date information on current trends, strategic planning for meetings, budgeting and funding, marketing and promotion, technology, running and closing the meeting, and industry developments on the horizon.

Software Engineering Penerbit Andi

From the most distinguished and influential senator of our time comes a reflective, blunt, deeply personal assessment of where America stands today.

Fulbright will appear on 60 Minutes.

Systems Analysis and Design ITBM

The use of electronic voting systems has caused controversy in the media and among the general public, and has even come under the scrutiny of the law courts. It has become clear that the uncertainties surrounding the introduction of e-voting are rarely of a technical nature, but primarily raise political and societal concerns. The key issue is to ensure that the principles of free and fair elections are upheld, regardless of the voting method chosen. This handbook is written for governments and organisations considering whether or not to conduct e-voting pilot schemes and trials or to make e-voting a feature of their electoral system. It reviews relevant issues such as building and safeguarding trust in the system, The value of open-source software And The implications of a voter verifiable audit paper trail. Concrete e-voting issues are discussed in the framework of the electoral cycle. This handbook can be used as a stand-alone guide, but governments or organisations would benefit most by consulting it in conjunction with Recommendation Rec(2004)11 of the Committee of Ministers of the Council of Europe on legal, operational and technical standards for e-voting

Science for the Protection of Indonesian Coastal Ecosystems (SPICE) Cornell University Press

Science for the Protection of Indonesian Coastal Ecosystems (SPICE) provides key information on all aspects related to the management of coastal ecosystems. This includes the coastal management involved, the ecology of this area, and the relationship between humans and the environment found here. The book presents guidelines defined by scientific experts, allowing for proper application of science products into ecosystem management. The bio-geo-physical importance of coastal ecosystems of Indonesia makes this a book of global importance and interest. Written by an Indonesian-German author team, giving a unique and global perspective on the coastal ecosystems Presents text boxes with research gaps and policy implications, giving the reader an easy grasp of what needs to be done in terms of research and management Features best practice case-studies that can be applied to coastal ecosystems around the world, offered through the lens of Indonesia, a region of global relevance in terms of climate and environmental change

Banal Nationalism CIFOR

This book discusses dissipative phenomena, in particular the origins of friction at all scales, in mechanics, physics and chemistry, encountered in all fields of tribology, from thick film lubrication to dry friction.

A Quest for True Islam: A Study of the Islamic Resurgence Movement Among the Youth in Bandung, Indonesia Springer

The Brennan Center at NYU convened a high-level task force of voting experts from government, academia, and business to systematically analyze various threats to voting technologies that are widely used across the country today. This book offers specific remedies and countermeasures to identify and protect democratic elections from widespread fraud and sabotage.

Managing Quality World Bank Publications

The debate on the future of the aviation sector and the viability of its traditional business practices is the core of this book. The liberalization of the EU market in the 1990s has radically modified the competitive environment and the nature of airline competition. Furthermore, the new millennium began with terrorist attacks, epidemics, trade globalization, and the rise of oil prices, all of which combined to push the industry into a "perfect storm". Airline industry profitability has been an elusive goal for several decades and the recent events has only accentuated existing weaknesses. The main concern of industry observers is whether the airline business model, successful during the 1980s and 1990s, is now sustainable in a market crowded by low-cost carriers. The airlines that will respond rapidly and determinedly to increase pressure to restructure, consolidate and segment the industry will achieve competitive advantages. In this context, the present study aims to model the new conduct of the 'legacy' carriers in a new liberalized European market in terms of network and pricing competition with low-cost carriers and competitive reaction to the global economic crises.

Electoral System Design Council of Europe

The constitutions of many countries guarantee the right to vote for all citizens. However, in reality, voters who are outside their home country when elections take place are often disenfranchised because of a lack of procedures enabling them to exercise that right. Voting from Abroad: The International IDEA Handbook examines the theoretical and practical issues surrounding external voting. It provides an overview of external voting provisions in 115 countries and territories around the world, including a map illustrating the regional spread.
