Routledge English for Business Studies in Higher Education Studies The Garnet Education English for Specific Academic Purposes series won the Duke of Edinburgh English Speaking Union Language Book Award in 2009. English for Business Studies is a skills-based course designed specifically for students of business who are about to enter English-	medium tertiary level studies. It provides carefully graded practice and progressions in the key academic skills that all students need, such as listening to lectures and speaking in seminars. It also equips students with the specialist business language they need to participate successfully within a business studies faculty. Extensive listening exercises	come from business studies lectures, and all reading texts are taken from the same field of study. There is also a focus throughout on the key business vocabulary that students will need. Listening: how to understand and take effective notes on extended lectures, including how to follow the argument and identify the speaker's point of view. Speaking: how to participate effectively in a

variety of realistic situations, from seminars to presentations, including how to develop an argument and use stance markers.  
Reading: how to understand a wide range of texts, from academic textbooks to Internet articles, including how to analyze complex sentences and identify such things as the writer's stance.  
Writing: how to produce coherent and well-structured

assignments, including such skills as paraphrasing and the use of the appropriate academic phrases.  
Vocabulary: a wide range of activities to develop students' knowledge and use of key vocabulary, both in the field of business studies and of academic study in general.  
Vocabulary and Skills banks: a reference source to provide students with revision of the

key words and phrases and skills presented in each unit. Full transcripts of all listening exercises. The Garnet English for Specific Academic Purposes series covers a range of academic subjects. All titles present the same skills and vocabulary points. Teachers can therefore deal with a range of ESAP courses at the same time, knowing that each subject title will focus on the same key skills and

follow the same structure. Key Features Systematic approach to developing academic skills through relevant content. Focus on receptive skills (reading and listening) to activate productive skills (writing and speaking) in subject area. Eight-page units combine language and academic skills teaching. Vocabulary and academic skills bank in each unit for reference and revision. Audio CDs for

further self-study or homework. Ideal coursework for EAP teachers. This text is intended to help students of Russian and graduates

considering employment to familiarise themselves with the Russian business environment, its concepts and practices. It assumes at least an A-level knowledge of Russian, but is self-explanatory after that. It will also introduce students to the vocabulary and register of language associated with this field. No prior knowledge of business practice or economic

concepts is required: explanations, and in many cases, translations are provided. The return to a market system after a long period of centralised planning of the economy in Russia has revived some of the terminology and ideas current before 1917, but many Western attitudes, concepts and institutions, and much of the vocabulary, have been adopted in the last few years. The aim is to

clarify what has emerged in the Russian business environment, and to activate the language associated with this process. It is not a phrase book or business letter-writing handbook. Its scope is the major developments that have underlain the post-perestroika economy, such as privatization, advertising, business organisation, small businesses, the labour

market, banking and inflation. Each is covered in a 'Unit' including clear explanations, glossaries, activities and texts taken from Russian business periodicals. *English File - Beginner* Bloomsbury Publishing Case Studies for Business English is designed for students of Business English in universities and vocational colleges. Studying case studies enables students to develop their

analytical skills, critical and strategic thinking, understanding of business theory, business knowledge, and business communication skills. Students also enhance their ability to use and select the correct tool for business communication at the right time. They practice, experiment, get feedback, and gain practical skills. *Case Studies for Business English* is a course that is engaging, motivating,

and pragmatic. Each unit contains an original case study text, exercises to develop understanding and communication of business tools and strategy, a step-by-step approach to case study analysis and report writing, as well as role plays and tips on developing business communication skills for presentations and meetings. In addition, students can benefit from a full reference section with a step-by-step

checklist for case study analysis, a guide for exam assessment, a selection of supplementary case study texts, and an answer key. CEFR level B2/C1

Cambridge University Press  
*Corpus-Based Approaches to ELT* presents a compilation of research exploring different ways to apply corpus-based and corpus-informed approaches to

English language teaching. Starting with an overview of research in the field of corpus linguistics and language teaching, various scenarios including academic and professional settings, as well as English as International Language, are described. Corpus-Based Approaches to ELT goes on to put forward several chapters focusing on error analysis using learner corpora and comparable native speaker corpora. Some of these chapters use translations and their original sources, while others compare the production of learners from different L1 in multilingual learner corpora. Also presented are new tools for corpus processing: a query program for parallel corpora, and the provision of tools to implement pedagogical annotation. The last section discusses the challenges and opportunities that multilayered and multimodal corpora may pose to corpus linguistic investigation. This book will be indispensable to those teaching in higher education and wishing to develop corpus-based approaches, as well as researchers in the field of English Language Teaching.

**Exploring Business Language and Culture**  
Pearson Education ESL  
With the unrelenting spread of globalization, the English

language has been firmly established as the Lingua Franca. Now more than ever, the importance of learning English is paramount within nearly all professional and educational sectors. English for Specific Purposes (ESP) has long been accepted as an effective method for teaching English as a foreign language. In recent years, it has experienced an increasing

presence in secondary and tertiary education across the globe. This is predominantly due to its learner-centered approach that focuses on developing linguistic competence in the student's specific discipline, may that be academics, business or tourism, for example. Positioning English for Specific Purposes in an English Language Teaching Context attempts to

present and define the relevance and scope of ESP within English Language teaching. From mobile phones as educational tools to the language needs of medical students, the contributors to this volume examine and propose different epistemological and methodological aspects of ESP teaching. Its unique approach to ESP marks this volume out as an important and necessary contribution to

existing ESP literature, and one that will be of use to both researchers and practitioners of ESP.
