Volume 105 of Terrorism: Commentary on Security Documents, Narco-Terrorism, brings researchers up to date on U.S. and international efforts to stem terrorism related to drug trafficking.

In the pages of this volume, readers will find both legal documents from criminal cases against narco-terrorists and governmental reports on how to approach the problem on a broader level. After showing recent trends in combating narco-terrorism globally, Volume 105 focuses on the rising drug crises in Colombia and Afghanistan. Researchers will find in this volume not just U.S. agencies' major reports on international drug-trafficking but also similarly comprehensive reports from international organizations, from NGOs to the U.N. These reports

place a particular focus on the connection between terrorist activity and the global narcotics trade. The section on Colombia, while updating readers on the international struggle with that country's drug cartels, also includes an analysis of the political, diplomatic, and economic challenges in intervening there. The Afghanistan portion of the volume shows how the U.S. has tried to confront the heroin trade that has funded the Taliban there, including an example of how the U.S. government has used criminal prosecutions domestically to curb that trade.

VOLUME 145 Oceana Publications

Volume 109 of *Terrorism: Commentary on Security Documents*, "Terror-Based Interrogation," provides a documentary history of U.S. interrogation policy since 9/11. General Editor Douglas Lovelace presents in this volume the Bush Administration memos that asserted a legal basis for coercive interrogation, commonly known as the "torture memos," including those written by the controversial Department of Justice attorney John Yoo. Volume 109 guides researchers from those memos through Congressional efforts at banning torture to current Obama Administration steps to ensure compliance with international norms against coercive interrogation. Students and scholars alike will find in this volume an indispensable source for research on U.S. interrogation policies in the post-9/11 era.

U.N. RESPONSE TO AL-QAEDA *Terrorism: Commentary on Security Documents* is a series that provides primary source documents and expert commentary on various topics relating to the worldwide effort to combat terrorism, as well as efforts by the United States and other

nations to protect their national security interests. Volume 141, *Hybrid Warfare and the Gray Zone Threat*, considers the mutation of the international security environment brought on by decades of unrivaled U.S. conventional military power. The term "hybrid warfare" encompasses conventional warfare, irregular warfare, cyberwarfare, insurgency, criminality, economic blackmail, ethnic warfare, "lawfare", and the application of low-cost but effective technologies to thwart high-cost technologically advanced forces. This volume is divided into five sections covering different aspects of this topic, each of which is introduced by expert commentary written by series editor Douglas C. Lovelace, Jr. This volume contains thirteen useful documents exploring various facets of the shifting international security environment, including a detailed report on hybrid warfare issued by the Joint Special Operations University and a White Paper on special operations forces support to political warfare prepared by the U.S. Army Special Operations Command, as well as a GAO report and a CRS report covering similar topics. Specific coverage is also given to topics such as cybersecurity and cyberwarfare, the efficacy of sanctions in avoiding and deterring hybrid warfare threats, and the intersection of the military and domestic U.S. law enforcement.

The Evolution of the Islamic State Oceana Publications

Terrorism: Commentary on Security Documents is a series that provides primary source documents and expert commentary on various topics relating to the worldwide effort to combat terrorism, as well as efforts by the United States and other nations to protect their national security interests. Volume 143, *The Evolution of the Islamic State*, focuses on the U.S. response

to the Islamic State (IS) both in Syria and Iraq from a foreign policy standpoint and a military strategy perspective, as well as considering the impact of the rise of IS on the broader global jihadist movement. Consideration is also given to the importance of information warfare in countering IS's worldwide recruiting efforts via the Internet. This volume also includes documents examining related issues of great importance, including a report considering IS's financing, a report on the legal issues arising in connection with U.S. military action against IS, the role of Shia warlords and militias in Iraq in opposing IS, and the lessons that can be learned from the support provided to IS by European fighters.

Terrorism: Commentary on Security Documents is a series that provides primary source documents and expert commentary on various topics relating to the worldwide effort to combat terrorism, as well as efforts by the United States and other nations to protect their national security interests. Volume 135, *Assessing Future U.S. National Defense Needs*, examines the changes in U.S. national defense priorities in the second term of the Obama administration, including a decreased emphasis on the war against terrorists and a new conceptualization of national defense firmly nested within the larger context of national security. The documents included in this volume include policy statements from the Secretary of Defense, strategic intelligence estimates, defense efficiency initiatives, assessments of the ramifications of reducing the size and capabilities of the U.S. Army and Marine Corps, and reports on irregular warfare and

special operations,

EXTRAORDINARY RENDITION Terrorism: Commentary on Security Documents Volume 103, *Global Issues*, continues the recent changes to this series that have justified a new publisher-brand, a new title, and a re-designed cover. That new title emphasizes the expert commentary now provided by three leading scholars in the field: Doug Lovelace, Director of the Army War College's Strategic Studies Institute, Kristen Boon of Seton Hall Law School, and Aziz Huq of the University of Chicago School of Law. In this particular volume, Lovelace updates researchers on new developments in various regions of the world. He devotes many pages to the debacle along the Afghanistan-Pakistan border, where Pakistan harbors extremists conducting the insurgency in Afghanistan. Both the documents selected by Lovelace and his insightful commentary describe how the U.S., under advice from Special Envoy Dick Holbrooke, has changed its approach to the problem by treating Afghanistan and Pakistan as one party instead of two. Volume 103 ("Global Issues") also examines the complex issue of China's possible assistance to terrorists overseas. For example, some weapons used against coalition forces in Afghanistan originate from China, despite China's promise to help the U.S. in its war against terror. Lovelace and the documents he presents also assess India's measured, thoughtful reaction to allegations that Pakistan facilitated the November terrorist attacks in Mumbai. The volume also alerts readers to disturbing developments in South America, where such groups as FARC in Colombia and The Shining Path in Peru have persisted in their profit-seeking campaigns of violence, despite those countries'

general success in diminishing their power.

Terrorism: Commentary on Security Documents is a series that provides primary source documents and expert commentary on various topics relating to the worldwide effort to combat terrorism, as well as efforts by the United States and other nations to protect their national security interests. Volume 144, *Autonomous and Semiautonomous Weapons Systems*, examines the impact of robots and autonomous and semiautonomous weapons systems on the waging of modern warfare. It considers the likely effects of emerging technological innovations in this area from both a political and strategic standpoint, in addition to considering the implications of such technologies within the context of the law of armed conflict and international humanitarian law. This volume is divided into three sections: (1) U.S. policy and approaches to the use of autonomous and semiautonomous weapons systems; (2) U.S. armed forces use of such weapons systems; and (3) potential terrorist use of such weapons systems. Official policy documents from the DoD and the U.S. Army and Air Force are complemented by reports from the Strategic Studies Institute/Army War College Press and other U.S. military sources.

Terrorism: Commentary on Security Documents is a series that provides primary source documents and expert commentary on various topics relating to the worldwide effort to combat terrorism, as well as efforts by the United States and other nations to protect their national security interests. Volume 138, *The Resurgent Terrorist Threat*, examines the changing threat of terrorism and why after over a decade of concerted effort terrorism is still a threat. The documents included in this volume include reports on the future of terrorism, cyberterrorism, the Project BioShield Act, combating terrorism in Africa, and the resurgence of terrorist organizations in Syria and Iraq.

Terrorism: Commentary on Security Documents is a series that provides primary source documents and expert commentary on the worldwide counter-terrorism effort. Among the documents collected are transcripts of Congressional testimony, reports by such federal government bodies as the Congressional Research Service (CRS) and the Government Accountability Office (GAO), and case law covering issues related to terrorism. Most volumes carry a single theme, and inside each volume the documents appear within topic-based categories. The series also includes a subject index and other indices that guide the user through this complex area of the law. Volume 122, *U.N. Response to Al Qaeda-Developments Through 2011*, discusses recent actions by the United Nations in response to Al-Qaeda, particularly focusing on sanctions under Security Council Resolution 1267 as well as regional responses and court challenges to 1267 sanctions. The documents introduced by Kristen Boon include the key Security

Council resolutions, EU regulations, court decisions, and reports by Security Council committees and external bodies.

TERRORISM: COMMENTARY ON SECURITY DOCUMENTS VOLUME 141 Oxford University Press, USA

With approximately eight new volumes released each year, this series is an extensive collection of significant U.S.-generated documents covering all major and minor issues and events regarding terrorism. Government reports, executive orders, speeches, court proceedings, and position papers are presented. Global Issues Oxford University Press

Volume 108 of *Terrorism: Commentary on Security Documents* tackles the contentious issue that appears in the volume's title: "Extraordinary Rendition". Although many commentators and publications have focused on the U.S. policy of such troubling transfers, little focus has been devoted to the reaction to this policy by the rest of the world. In this volume, new General Co-Editor Aziz Huq both presents the key documents demonstrating that reaction and comments authoritatively on what those documents mean for the future of torture-based international transfers. For ease of research, Huq has divided the volume into two sections: the first deals with U.N. and E.U. responses to the U.S. policy, including a case before the U.N. Committee Against Torture, and the second section tours the reports and cases on rendition that have arisen from national jurisdictions, specifically Italy, Sweden, the U.K., Ireland, and Canada.

Volume 118 of *Terrorism: Commentary on Security Documents*,

International Nuclear Security contains documents that illustrate the implementation and evolution of the nuclear regulation, disarmament, and non-proliferation regimes created by various states and international bodies. Efforts to control nuclear weapons have redoubled since the events of September 11, 2001. In order to help States prevent and respond to the risk of nuclear terrorism, the International Atomic Energy Agency established a nuclear security program in 2002 and the United Nations General Assembly also adopted the International Convention for the Suppression of Acts of Nuclear Terrorism in 2005. Both instruments focus on verification and the various other documents in this volume provide a comprehensive look at modern efforts to combat nuclear security concerns.

Terrorism: Documents of International and Local Control is a hardbound series that provides primary-source documents on the worldwide counter-terrorism effort. Chief among the documents collected are transcripts of Congressional testimony, reports by such federal government bodies as the Congressional Research Service and the Government Accountability Office, and case law covering issues related to terrorism. The series also includes a subject index and other indices that guide the user through this complex area of the law. Overall, the series keeps users up-to-date on the panoply of terrorism issues now facing the U.S.

Terrorism Commentary on Security Oxford University Press Volume 106 of Terrorism: Commentary on Security Documents, Terrorist Financing and Money Laundering, guides readers through the complex legal terrain of terrorist financing and

money-laundering. Researchers will benefit from the diversity of this volume's selection: from U.S. agency reports on how to implement the recommendations of the 9/11 Commission to the efforts of the European Parliament in seizing assets to two perspectives on how well Saudi Arabia is combating terrorist financing within its borders: the U.S. perspective and the perspective of Saudi Arabia itself. Equally important for researchers is this volume's extensive treatment of U.N. measures on terrorist financing and money laundering. The volume concludes with the full text of the model rules for regulating terrorism-related financial transactions, as promulgated by a joint body of the U.N. and the International Monetary Fund.

The Evolution of the Islamic State Oxford University Press Volume 110 of Terrorism: Commentary on Security Documents, "Assessing the GWOT," provides researchers with a one-volume update on how the U.S. is faring in its global war on terrorism, or "GWOT." The volume pays special attention to the monetary cost of that war. General Editor Douglas Lovelace also guides readers through a regional tour of the GWOT's battlefields, particularly in Iraq and Afghanistan. Researchers will benefit especially from Lovelace's analysis of the influence that Iran currently exercises over insurgent activity in Iraq. Given the many facets of U.S. anti-terror policy and the many strands of the legal debate over it, this volume provides a helpfully concise and illuminating picture of the current state of that policy.

In Volume 107 of Terrorism: Commentary on Security Documents, entitled "U.N. Response to Al Qaeda", new General Co-Editor

Kristen Boon covers the history that started with U.N. Security Council Resolution 1267 in 1999 and that continues today. In that document, the United Nations established sanctions against any individuals or organizations financially supporting those two terrorist organizations or Osama bin Laden. With her expert commentary on all documents flowing from that resolution, Boon traces the unfolding fate of those sanctions, from the amending resolutions that expanded the sanctions' purview to the provision of a notice period for targeted parties to specific countries and regions' implementing legislation to court challenges claiming that the sanctions violate the targeted parties' human rights. No other book offers what this volume does: an expert guide to the U.N.'s first effort at sanctioning a select group of parties rather than a broad, comprehensive category of unspecified people.

Terrorism: Commentary on Security Documents is a series that provides primary source documents and expert commentary on various topics relating to the worldwide effort to combat terrorism, as well as efforts by the United States and other nations to protect their national security interests. Volume 148, Lone Wolf Terrorists, examines the phenomenon of the solitary domestic terrorist, analyzes the distinction between such terrorists and mass murderers who are not deemed to be terrorists, considers the motivations of violent extremists, and examines the dilemmas faced by law enforcement in preventing solitary political extremists with violent ideologies from translating their beliefs into actions. The volume is divided into three sections, providing an overview of the topic, an examination of strategies for prevention of such attacks, and a consideration of the Internet's role in contributing to radicalization. Documents included in this volume include a CRS report on domestic terrorism, a report examining violent radicalization from a criminal justice perspective, and a CRS report differentiating hate crimes from domestic terrorism, as well as other reports on the lone wolf terrorism phenomenon and strategies to prevent and/or counter it. The last document in the volume is a CRS report relating to the advocacy of terrorism on the Internet, especially including social media, and the ways in

which law enforcement might be able to address the problem of dangerous online speech within the current U.S. legal structure.
