Rammed Earth

Construction: Cutting-

Edge Research on

Traditional and Modern

Rammed Earth is a

collection of peer-

reviewed papers

presented at the First

International Conference

on Rammed Earth

Construction (ICREC2015,

University of Western

Australia, Perth, Western

Australia, 10-13 February

2015) by academics,

engineers and rammed

earth practitioners from

around the world. The

topics discussed in the

book include: •

• Construction procedures •

• Durability assessment •

• Material characterisation

• Seismic design • Soil

suitability • Structural and

thermal performance •

• Traditional and stabilised

rammed earth structures

Rammed Earth

Construction: Cutting-

Edge Research on

Traditional and Modern

Rammed Earth will be a

valuable reference for

academics, engineers and
practitioners for
describing the state-of-
the-art in rammed earth
research and
understanding.

Impact Evaluation in
Practice, Second Edition

UNC Press Books

With contributions from a

distinguished group of

world-builders, including

academics, writers, and

designers, this anthology

of essays describes the

process and discusses the

nature of subcreation and

the construction of

worlds. From Oz to MUD,

Walden to Rockall, all the

worlds featured in this

volume share one thing in

common: they began in

someone's imagination,

grew from there, and

became worlds built with

the assistance of multiple

authors and a variety of

different ideas and media,

including designs,

imagery, sound, music,

stories, and more. The

book examines this

development, with

examples and discussions

pertaining to the process

and the final product of

the building of imaginary

worlds, including some

transmedial worlds.

World-Builders on World-

Building is a fascinating

deep dive into the
practical problems of
world-building as well as
its theoretical aspects. It
is ideal for students,
scholars, and even
practitioners interested in
media studies, game
studies, subcreation
studies, franchise studies,
transmedia studies, and
pop culture.

Making Democracy Work

SAGE Publications

The "global" is

permanently made and

remade by how it is

envisioned in political

projects, in language, and

in literature. Through a

range of case studies, this

book shows how practices

of referring to the world

actually constitute the

global in its many facets.

It aims to provide a sense

in readers of how the

global is not

something "out there", but

that it is embedded in a

wide range of the

seemingly "everyday".

The contributions appeal

to a readership from a

background in Sociology,

History, Political Science,

Literary Studies, and

Social Work.

The Experiential

Caribbean CRC Press

Why do some democratic

governments succeed and

others fail? In a book that has received attention from policymakers and civic activists in America and around the world, Robert Putnam and his collaborators offer empirical evidence for the importance of "civic community" in developing successful institutions. Their focus is on a unique experiment begun in 1970 when Italy created new governments for each of its regions. After spending two decades analyzing the efficacy of these governments in such fields as agriculture, housing, and health services, they reveal patterns of associationism, trust, and cooperation that facilitate good governance and economic prosperity.

World Dredging, Mining & Construction Univ of California Press

This book examines the social production of our world, of the worlds of the past and of the worlds of the future, considering the ways in which worlds are created in both actuality and imagination. Bringing together central concepts of classical sociology, including social change, transformation, individuation, collectivisation and human imagination and practice, it draws lessons

from the collapse of Graeco-Roman antiquity for our own world of virus and ecological disasters, considers the genesis of capitalism and intimates its ending. Rooted in classical sociology yet challenging its traditions and objects of study, *Visualising Worlds: World-Making and Social Theory* adopts new ways of thinking about visuality, aesthetics and how we 'see' social worlds, and how we then begin to build them. As such, it will appeal to scholars across the social sciences with interests in social theory, historical sociology, cultural studies, critical theory, archaeology, and the emergence, change and collapse of civilisations.

World of Our Making University of Chicago Press

Drwaing on extensive archival sources, Laura Stark reconstructs the daily lives of scientists, lawyers, administrators, and research subjects working - and 'warring' - on the campus of the National Institutes of Health, where they first wrote the rules for the treatment of human subjects.

[Introduction to Research - E-Book](#) Cambridge University Press

This book is a major contribution to the history of analytic philosophy in general and of logical positivism in particular. It provides the first detailed and comprehensive study of Rudolf Carnap, one of the most influential figures in twentieth-century philosophy. The focus of the book is Carnap's first major work: *Der logische Aufbau der Welt* (The Logical Structure of the World). It reveals tensions within the context of German epistemology and philosophy of science in the early twentieth century. Alan Richardson argues that Carnap's move to philosophy of science in the 1930s was largely an attempt to dissolve the tension in his early epistemology. This book fills a significant gap in the literature on the history of twentieth-century philosophy. It will be of particular importance to historians of analytic philosophy, philosophers of science, and historians of science. *World-Builders on World-Building* Princeton University Press

Educators have a key pedagogical role in promoting early years outdoor play in natural environments. Active outdoor play involving

risk-taking has been linked to positive effects on social health and behaviour, and encourages physical activity and motor skill development. At the same time, it has been recognised that opportunities for children to experience outdoor learning have been reduced in recent decades due to the impacts of technology, urbanisation and social change. This book brings together renowned authors, with research and professional experience in a range of disciplines, to provide a comprehensive guide to developing positive and engaging outdoor learning environments in the early years. Part 1 looks at pedagogy and outdoor environments, and considers the value of risk-taking and developing a young child's appreciation of the natural world. Part 2 examines the key principles involved in the design and planning of these spaces, such as applying the relevant equipment standards and regulations. Part 3 explores how educators can develop an understanding of children's own perspectives on outdoor spaces, including

promoting agency and recognising the importance of private playspaces. Part 4 examines different cultural perspectives on outdoor play, including Indigenous approaches, while Part 5 considers the range of experiences possible beyond purposefully-designed spaces, from visiting nature reserves to exploring urban environments. 'A much needed and comprehensive resource for pre-service teachers and educators of young children that encompasses philosophies, theories, pedagogy and practice for purposeful engagement of children in all kinds of outdoor spaces in Australia.' - Dr Kumara Ward, Director of Academic Program: Early Childhood Education, Western Sydney University 'This seminal work will provide a shared language and framework for educators, policy developers, community builders and researchers in exploring the justifications for engaging children in well considered outdoor learning places and spaces.' - Leanne Grogan, School of Education, Outdoor and

Environmental Studies, La Trobe University.

Study of Export-Import Bank and World Bank, Hearings Before ..., 83:2-.... Routledge

David J. Chalmers constructs a highly ambitious and original picture of the world, from a few basic elements. He returns to Rudolf Carnap's attempt to do the same, and adopts the idea of scrutability—according to which reasoning from a limited class of basic truths yields all truths about the world—to address central themes in philosophy.

Theory in Social and Cultural Anthropology

Elsevier Health Sciences
A survey of building techniques & architecture from the 3rd century B.C. through the fifth century A.D., this volume explores how the Greeks of the classical period & later the Romans created a complex & innovative built environment.

A World of Many Worlds

Routledge
Opening a window on a dynamic realm far beyond imperial courts, anatomical theaters, and learned societies, Pablo F. Gomez examines the strategies that Caribbean people used to create authoritative, experientially based

knowledge about the human body and the natural world during the long seventeenth century. Gomez treats the early modern intellectual culture of these mostly black and free Caribbean communities on its own merits and not only as it relates to well-known frameworks for the study of science and medicine. Drawing on an array of governmental and ecclesiastical sources—notably Inquisition records—Gomez highlights more than one hundred black ritual practitioners regarded as masters of healing practices and as social and spiritual leaders. He shows how they developed evidence-based healing principles based on sensorial experience rather than on dogma. He elucidates how they nourished ideas about the universality of human bodies, which contributed to the rise of empirical testing of disease origins and cures. Both colonial authorities and Caribbean people of all conditions viewed this experiential knowledge as powerful and competitive. In some ways, it served to respond to the ills of slavery. Even more crucial, however, it

demonstrates how the black Atlantic helped creatively to fashion the early modern world. Carnap's Construction of the World Duke University Press

As the construction industry continues to develop within the natural environment, the industry has to take strong measures to ensure that its activities are in harmony with the environment. The challenge for the construction sector is not just to respond to the need for adequate housing and rapid urbanisation, but to do it in a way that is socially and ecologically responsible. This book begins with the current progress of the construction industry in Malaysia before shifting to the fragile relationship between construction and environment. Knowing the rapid development in Malaysia and how construction can affect the environment, this book delves into some evidence of environmental degradation in Malaysia. In the mist of degradation, there is some light shone by the government agencies, state government and some construction players who

have initiated several actions to improve present situation. Construction players must be ready to address these concerns, aware of the requirements and comply with it, while the government must be ready to implement and enforce the requirement. An effective planning, implementation and monitoring is vital if the environment is to be part of the culture of the construction industry everywhere.

From Lived Experience to the Written Word

Academic Conferences Limited

This book offers a rich collection of international research narratives that reveal the qualities and value of peer play. It presents new understandings of peer play and relationships in chapters drawn from richly varied contexts that involve sibling play, collaborative peer play, and joint play with adults. The book explores social strategies such as cooperation, negotiation, playing with rules, expressing empathy, and sharing imaginary emotional peer play experiences. Its reconceptualization of peer play and relationships promotes

new thinking on children's development in contemporary worlds. It shows how new knowledge generated about young children's play with peers illuminates how they learn and develop within and across communities, families, and educational settings in diverse cultural contexts. The book addresses issues that are relevant for parents, early years' professionals and academics, including the role of play in learning at school, the role of adults in self-initiated play, and the long-term impact of early friendships. The book makes clear how recent cultural differences involve digital, engineering and imaginary peer play. The book follows a clear line of argument highlighting the importance of play-based learning and stress the importance of further knowledge of children's interaction in their context. This book aims to highlight the narration of peer play, mostly leaning on a sociocultural theoretical perspective, where many chapters have a cultural-historical theoretical frame and highlight children's social situation of development. Polly Björk-Willén, Linköping University,

Sweden
Discourse Wars In Gotham-west SAGE Publications
 The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to

evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.
Visualising Worlds CRC Press
 At the heart of this book is the authors' firm belief that understanding research methods is critical to being an informed citizen in our complex, fast-paced social world. Now in its Fifth Edition, *Making Sense of the Social World* by Daniel F. Chambliss and Russell K. Schutt continues to help students achieve that understanding by providing a balanced treatment of qualitative and quantitative methods, integrating substantive

examples and research techniques throughout. All essential elements of social research methods are covered, including validity, causation, experimental and quasi-experimental design, and techniques of analysis. Additionally, it is written in a less formal style to make concepts more accessible to students, and it includes wide-ranging, practical exercises drawn from every experience to help students get hands-on with the material. Not only do students find the book approachable and easy to digest, but they also enjoy it!

Envisioning the World

Springer Nature

This book is one of the few scholarly works on critical pedagogy that makes use of empirical data in the specific context of analyzing both academic and sociopolitical articulations of critical student agency and agentive growth of Latino immigrant students.

In-depth Study Reports from the World Survey of Current Research and Development on Roads and Road

Transport World Bank Publications

"This book focuses on how literate artisans began to

write about their discoveries starting around 1400: in other words, it explores the origins of technical writing. Artisans and artists began to publish handbooks, guides, treatises, tip sheets, graphs and recipe books rather than simply pass along their knowledge in the workshop. And they tried to articulate what the new knowledge meant. The popularity of these texts coincided with the founding of a "new philosophy" that sought to investigate nature in a new way. Smith shows how this moment began in the unceasing trials of the craft workshop, and ended in the experimentation of the natural scientific laboratory. These epistemological developments have continued to the present day and still inform how we think about scientific knowledge"--

Rammed Earth

Construction University of Chicago Press

This volume of essays brings together John Gerard Ruggie's most influential theoretical ideas and their application to critical policy questions concerning the post-Cold War international order.

Rural Transport Services

Oxford University Press
An exploration of how design might be led by marginalized communities, dismantle structural inequality, and advance collective liberation and ecological survival. What is the relationship between design, power, and social justice? "Design justice" is an approach to design that is led by marginalized communities and that aims explicitly to challenge, rather than reproduce, structural inequalities. It has emerged from a growing community of designers in various fields who work closely with social movements and community-based organizations around the world. This book explores the theory and practice of design justice, demonstrates how universalist design principles and practices erase certain groups of people—specifically, those who are intersectionally disadvantaged or multiply burdened under the matrix of domination (white supremacist heteropatriarchy, ableism, capitalism, and settler colonialism)—and invites readers to "build a better world, a world where many worlds fit; linked worlds of collective

liberation and ecological sustainability." Along the way, the book documents a multitude of real-world community-led design practices, each grounded in a particular social movement. Design Justice goes beyond recent calls for design for good, user-

centered design, and employment diversity in the technology and design professions; it connects design to larger struggles for collective liberation and ecological survival. *World Hypotheses* MIT Press
In this study of Paul, Dr.

Adams focuses on Paul's understanding and use of cosmological concepts, such as world and creation. He examines Paul's historical and social context and illuminates the whole cosmological project of Pauline Christianity.
