This book explores the relationship between populism or populist regimes and constitutional interpretation used in those regimes. The volume discusses the question of whether contemporary populist governments and movements have developed, or encouraged new and specific constitutional theories, doctrines and methods of interpretation, or whether their constitutional and other high courts continue to use the old, traditional interpretative tools in constitutional adjudication. The book is divided into four parts. Part I contains three chapters elaborating the theoretical basis for the discussion. Part II examines the topic from a comparative perspective, representing those European countries where populism is most prevalent, including

Austria, Croatia, the Czech Republic, Greece, Hungary, Italy, Poland, Romania, Spain, and the United Kingdom. Part III extends the focus to the United States, reflecting how American jurisprudence and academia have produced the most important contributions to the theory of constitutional interpretation, and how recent political developments in that country might challenge the traditional understanding of judicial review. This section also includes a general overview on Latin America, where there are also some populist governments and strong populist movements. Finally, the editors' closing study analyses the outcomes of the comparative research, summarizing the conclusions of the book. Written by renowned national constitutional scholars, the book will be essential reading for students, academics and researchers working in Constitutional Law and Politics. Filled with practical advice from experienced nurses and up-to-date clinical information, this new edition of the Oxford Handbook of Musculoskeletal Nursing is the invaluable guide for all nurses and allied health professionals working with patients who have rheumatological and musculoskeletal conditions. Written to ensure that a nurse in any care environment will have the core information they require at their

fingertips, this Handbook is split into three sections: musculoskeletal conditions and their management; clinical issues; and nursing care issues including treatment, nursing management, and tools. Management approaches have been fully updated since the first edition, and the changing healthcare environment and available treatments have been considered, alongside the move towards patient self-management and self-care. This Handbook also addresses the increasing demand for guidance in relation to musculoskeletal conditions, as the growing elderly and chronic disease populations needs for healthcare continue. Featuring brand new chapters on the patient's perspective, nurse-led clinics, and public health awareness, the Oxford Handbook of Musculoskeletal Nursing second edition is a practical and comprehensive guide to help the reader reach the best possible results for their patients.

Large-Scale Construction Project Management

This volume explores the

cultural significance of Brexit, situating it in debates about nation and identity. Contributors to this collection seek to contextualize Britain's decision to leave the EU and to assess its reverberations in language, literature, and culture. Addressing such aspects as British exceptionalism, myth-making, medievalism, and nostalgia, contributions range from travelogues, Ladybird books, and rural cinema-going to ageing. An important focus lies on marginalized groups and geographical fringes, as contributors attend to the Irish situation and the scarcity of EU migrants in Brexit literature (BrexLit). Finally, two essays widen the perspective to assess American parallels to the discourses about a Brexit that is still far from "done."

Compendium of GST Advance Authority Rulings with Summary - Including Appellate Rulings

Bloomsbury Publishing

This book aims to highlight the gaps and the transparency issues in the clinical research and trials processes and how there is a lack of information flowing back to researchers and patients involved in those trials. Lack of data transparency is an underlying theme within the clinical research world and causes issues of corruption, fraud, errors and a problem of reproducibility. Blockchain can prove to be a method to ensure a much more joined up and integrated approach to data sharing and improving patient outcomes. Surveys undertaken by credible organisations in the healthcare industry are analysed in this book that show strong support for using blockchain technology regarding strengthening data security, interoperability and a range of beneficial

use cases where mostly all respondents of the surveys believe blockchain will be important for the future of the healthcare industry.

Another aspect considered in the book is the coming surge of healthcare wearables using Internet of Things (IoT) and the prediction that the current capacity of centralised networks will not cope with the demands of data storage. The benefits are great for clinical research, but will add more pressure to the transparency of clinical trials and how this is managed unless a secure mechanism like, blockchain is used.

Shareholder Actions is a comprehensive guide to the possible actions shareholders may be entitled to pursue, on whichever side of the dispute they might be involved. As well as unfair prejudice and derivative actions, and the many personal actions arising from the Companies Act 2006, the book covers actions based in common law and equity, as well as actions based in other statutory law. It also explores occurrences of

directors owing fiduciary duties directly to shareholders and the 'no reflective loss' rule providing a clear view of its scope, but also its limitations. The book refers to judgments in other related jurisdictions when it is necessary to substantiate a submission not already fully and authoritatively addressed by English law. Scottish cases are referred to where the House of Lords or Supreme Court have dealt with an issue, or where the point of law overlaps with English law. There are separate chapters on taxation issues, shareholder claims in Australia, due the large cross pollination between English and Australian law and, for comparative purposes, on Canada where a very different approach is taken with its common law based system and South Africa. In addition to an expanded section on procedure with detailed consideration of the availability of interlocutory relief, the new 3rd edition also covers significant developments in case law that there have been since the 2nd edition including in relation to: - Directors' duties, eg *Julien v Evolving Technologies*;

Popely v Popely; Auden McKenzie (Pharma) Ltd v Patel; Re System Building Services Group; Dickinson v NAL Realisations (Staffordshire) Ltd and in the continuing Sharp v Blank litigation - Remedies following directors' breaches of duties, eg CPS v Aquila Advisory Ltd and in Interactive Technology v Fester - Derivative claims, eg Sevilleja Garcia v Marex Financial Ltd and Homes of England Ltd v Nick Bellman (Holdings) Ltd - Unfair prejudice petitions, eg Re G&G Properties Ltd; re Bankside Hotels Ltd, aka Griffith v Gourgey; George v McCarthy and Allnutt v Nags Head Reading Ltd - Just and equitable winding up, eg Chu v Lau - The doctrine of the non-recoverability of reflective loss, eg the decisions of both the Supreme Court and the Court of Appeal in the important case of Sevilleja Garcia v Marex Financial Ltd where this was considered and ultimately refined; and Re Hut Group Ltd, aka Zedra Trust Co (Jersey) Ltd v Hut Group Ltd - Access to company registers, eg Houldsworth Village Management v Barton - The liability of parent companies for the actions of their subsidiaries in
