MCCARTY CARMELO

CPD for Teaching and Learning in Physical Education Solution Tree

Offers a practical guide for improving schools dramatically that will enable all students from all backgrounds to achieve at high levels. Includes assessment forms, an index, and a DVD.

Raising the Bar and Closing the Gap Corwin

In the third edition of *Learning by Doing: A Handbook for Professional Learning Communities at Work®*, authors Richard DuFour, Rebecca DuFour, Robert Eaker, Thomas W. Many, and Mike Mattos provide educators with a comprehensive, bestselling guide to transforming their schools into professional learning communities (PLCs). In this revised version, contributor and Canadian educator Karen Power has adapted the third edition for Canadian educators, emphasizing how Canadian educators can effectively improve learning for each student across their unique and widely diverse provinces and territories. Rewritten so that the scenarios, research, and language appropriately meet the needs of Canadian educators, this version is packed with real-world strategies and advice that will assist readers in transforming their school or district into a successful PLC.

The PLC+ Playbook, Grades K-12 Solution Tree Press

"Gathering data and using it to inform instruction is a requirement for many schools, yet educators are not necessarily formally trained in how to do it. This book helps bridge the gap between classroom practice and the principles of educational psychology. Teachers will find cutting-edge advances in research and theory on human learning and teaching in an easily understood and transferable format. The text's integrated model shows teachers, school leaders, and district administrators how to establish a data culture and transform quantitative and qualitative data into actionable knowledge based on: assessment; statistics; instructional and differentiated psychology; classroom management."--Publisher's description.

Learning by Doing Routledge

A bold, brain-based teaching approach to culturally responsive instruction To close the achievement gap, diverse classrooms need a proven framework for optimizing student engagement. Culturally responsive instruction has shown promise, but many teachers have struggled with its implementation—until now. In this book, Zaretta Hammond draws on cutting-edge neuroscience research to offer an innovative approach for designing and implementing brain-compatible culturally responsive instruction. The book includes: Information on how one's culture programs the brain to process data and affects learning relationships Ten "key moves" to build students' learner operating systems and prepare them to become independent learners Prompts for action and valuable self-reflection

Every School, Every Team, Every Classroom Corwin Press

2018 Outstanding Academic Title, Choice Ambitious Science Teaching outlines a powerful framework for science teaching to ensure that instruction is rigorous and equitable for students from all

backgrounds. The practices presented in the book are being used in schools and districts that seek to improve science teaching at scale, and a wide range of science subjects and grade levels are represented. The book is organized around four sets of core teaching practices: planning for engagement with big ideas; eliciting student thinking; supporting changes in students' thinking; and drawing together evidence-based explanations. Discussion of each practice includes tools and routines that teachers can use to support students' participation, transcripts of actual student-teacher dialogue and descriptions of teachers' thinking as it unfolds, and examples of student work. The book also provides explicit guidance for "opportunity to learn" strategies that can help scaffold the participation of diverse students. Since the success of these practices depends so heavily on discourse among students, *Ambitious Science Teaching* includes chapters on productive classroom talk. Science-specific skills such as modeling and scientific argument are also covered. Drawing on the emerging research on core teaching practices and their extensive work with preservice and in-service teachers, *Ambitious Science Teaching* presents a coherent and aligned set of resources for educators striving to meet the considerable challenges that have been set for them.

PLC+ Solution Tree Press

This expansion of *Whatever It Takes* sharpens the focus on the pyramid of interventions strategy. The authors examine case studies of schools and districts across North America to illustrate how PLC at Work™ is a sustainable and transferable process that ensures struggling students get the support they need to achieve. They address how to enrich and extend the learning of proficient students and explain how PLC intervention processes align with RTI legislation.

Learning by Doing Corwin

This anthology presents the recommendations of education leaders, and each chapter contributes to a sound conceptual framework and offers specific strategies for developing PLCs. These leaders have found common ground in expressing their belief in the power of PLCs although clear differences emerge regarding their perspectives on the most effective strategy for making PLCs the norm in North America.

Whatever It Takes: How Professional Learning Communities Respond When Kids Don't Learn Solution Tree Press

The sequel to *Pyramid Response to Intervention* advocates that a successful RTI model begins by asking the right questions to create a fundamentally effective learning environment for every student. RTI is not a series of implementation steps, but rather a way of thinking. Understand why bureaucratic, paperwork-heavy, compliance-oriented, test-score-driven approaches fail. Then learn how to create a focused RTI model that works.

Questioning Education ASCD

Translate the science of learning into strategies for maximum learning impact in your classroom.

The content, skills, and understandings students need to learn today are as diverse, complex, and multidimensional as the students in our classrooms. How can educators best create the learning experiences students need to truly learn? *How Learning Works: A Playbook* unpacks the science of

how students learn and translates that knowledge into promising principles or practices that can be implemented in the classroom or utilized by students on their own learning journey. Designed to help educators create learning experiences that better align with how learning works, each module in this playbook is grounded in research and features prompts, tools, practice exercises, and discussion strategies that help teachers to Describe what is meant by learning in the local context of your classroom, including identifying any barriers to learning. Adapt promising principles and practices to meet the specific needs of your students—particularly regarding motivation, attention, encoding, retrieval and practice, cognitive load and memory, productive struggle, and feedback. Translate research on learning into learning strategies that accelerate learning and build students' capacity to take ownership of their own learning—such as summarizing, spaced practice, interleaved practice, elaborate interrogation, and transfer strategies. Generate and gather evidence of impact by engaging students in reciprocal teaching and effective feedback on learning. Rich with resources that support the process of parlaying scientific findings into classroom practice, this playbook offers all the moves teachers need to design learning experiences that work for all students!

Data Wise, Revised and Expanded Edition Turtleback Books

A school-wide model for addressing individual needs The greatest goal of education is to ensure equity while enhancing learning and academic success for all students. And yet, it is impossible for one teacher to meet the extensive needs of all students in his or her classroom. The traditional schooling model cannot provide for this complexity and leaves educators perplexed. The solution is a collaborative approach where “every child deserves a team” to surround them with supports that recognize their strengths and challenges. Collaborative Response offers a school-wide model for addressing students' individual needs. The three fundamental components of the model are: collaborative structures and processes; data and evidence; and continuum of supports. In this book, readers will find: Entry points for beginning this work Potential pitfalls of the approach Case studies from schools that have adopted the model Access to a website with tools, templates, case studies, and more With a focus on quality classroom instruction, this book shares examples from schools and districts that have transformed how they respond to the needs of all learners.

Collaborative Response Solution Tree

Drawing on best practice for the continuing professional development (CPD) of practising physical education teachers, this book encourages teachers to reflect on their own practices and how these can be developed as they continue their professional journey to support student learning. The book covers three main themes: improving students' learning and supporting student progress; the teacher as learner - developing your expertise as a teacher; and supporting professional development - how as a teacher you can lead and own your continuing learning in a sustainable manner. Throughout the book, teachers are encouraged not just to reflect on where they are now, but also what changes they INTEND to make to their practice, how they IMPLEMENT those changes and then to review the IMPACT this has had on students' learning. Each chapter includes tasks embedded within the content to encourage the reader to reflect on how they could apply the new knowledge they are acquiring from reading and engaging with the chapter. Written for a global audience, the book brings together examples from the Singapore Physical Education and Sports Teacher Academy (PESTA), which provides CPD to teachers in the high-performing Singaporean

system. Offering high quality research and practice, this book is a pivotal resource for physical education teachers undertaking CPD all over the world.

Ambitious Science Teaching Corwin

This research-based sequel to *Leading Professional Learning Communities* focuses on the practical process of implementing, improving, and sustaining PLCs. Appropriate for groups at all stages of PLC development, this field book helps educators improve PLC operations by facilitating individual and group development and growth. The authors provide learning opportunities that generate conversations about adult learning and contribute to supportive conditions that strengthen teacher quality and raise student outcomes.

The PLC+ Activator's Guide Routledge

Organization and Education Development combines reflective thinking and practice, action research living theory, and organization development to explore the self-discovery of meaning and purpose. It charts a journey undertaken by the author in pursuit of professional development through self-awareness and self-change as a fully integrated person and a better professor. This book is about an individual's integrative journey of self-discovery. The author's narrative includes values and organizational development concepts and theories shared with fellow travelers, including supervisors, friends, and students. He shares invaluable insights and examples with the reader, using a model of a six-spoke wheel of final discovery and the MICAI intersection model. These integrative guides provide examples on how to search for what is best in everyday life and what gives us true meaning, encouraging personal reflection and ways of nurturing appreciation for our own lives. This multidisciplinary book combines western and eastern models and philosophies and draws from organization development, positive psychology, and education development. It will be ideal reading for students, researchers, and academics in the fields of organizational development, organizational psychology, social psychology, and education. It will appeal to any reader interested in learning about self-development. The Open Access version of this book, available at <http://www.taylorfrancis.com>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Culturally Proficient Learning Communities Corwin Press

This 10th-anniversary sequel to the authors' best-selling book *Professional Learning Communities at Work™: Best Practices for Enhancing Student Achievement* merges research, practice, and passion. The most extensive, practical, and authoritative PLC resource to date, it goes further than ever before into best practices for deep implementation, explores the commitment/consensus issue, and celebrates successes of educators who are making the journey.

Leading Professional Learning Communities John Wiley & Sons

Every school strives to better itself so that it can better its students. In *Transformative Collaboration*, the authors dive deep into one of the strongest strategies for school improvement--the PLC process. You will explore five collaboration-based commitments--from gaining clarity to building trust--that will ultimately help you build and sustain a PLC that provides the best possible avenues of learning to students. Use this resource to provide students with the education they deserve: Commit to collaboration and use the five commitments to transform your school Understand what it means to be a PLC Find the courage to lead the process Build a climate of trust Shape school structures for

success Create clarity in collaboration Contents: Table of Contents About the Authors Foreword Preface Chapter 1: Understand What it Means to Be a PLC Chapter 2: Find the Courage You Need to Lead Chapter 3: Build a Climate of Trust Chapter 4: Shape School Structures for Success Chapter 5: Create Clarity in Collaboration Appendix: Key Terms References and Resources Index

Simplifying Response to Intervention Routledge

What makes a powerful and results-driven Professional Learning Community (PLC)? The answer is collaborative work that expands the emphasis on student learning and leverages individual teacher efficacy into collective teacher efficacy. PLC+: Better Decisions and Greater Impact by Design calls for strong and effective PLCs plus—and that plus is YOU. Until now, the PLC movement has been focused almost exclusively on students and what they were or were not learning. But keeping student learning at the forefront requires that we also recognize the vital role that you play in the equation of teaching and learning. This means that PLCs must take on two additional challenges: maximizing your individual expertise, while harnessing the power of the collaborative expertise you can develop with your peers. PLC+ is grounded in four cross-cutting themes—a focus on equity of access and opportunity, high expectations for all students, a commitment to building individual self-efficacy and the collective efficacy of the professional learning community and effective team activation and facilitation to move from discussion to action. The PLC+ framework supports educators in considering five essential questions as they work together to improve student learning: Where are we going? Where are we now? How do we move learning forward? What did we learn today? Who benefited and who did not benefit? The PLC+ framework leads educators to question practices as well as outcomes. It broadens the focus on student learning to encompass educational equity and teaching efficacy, and, in doing so, it leads educators to plan and implement learning communities that maximize individual expertise while harnessing the power of collaborative efficacy.

On Common Ground Corwin Press

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Leading Plcs at Work(r) Districtwide Corwin Press

"Hord is the originator of the triple-headed concept of professional learning communities. Sommers

is an experienced administrator and past president of the National Staff Development Council. With the authors' extensive backgrounds in educational evaluation and the implementation of school change and development, they are uniquely equipped to delineate and defend a particular vision of professional learning communities that has educational depth, professional richness, and moral integrity." —From the Foreword by Andy Hargreaves "The most important volume available to help principals undertake the challenging yet exhilarating work of building true communities of professional learning." —Joseph Murphy, Professor Vanderbilt University "The book does not gloss over the challenges that leaders will encounter. The authors draw upon rich research evidence and personal experiences and offer many practical, proven change strategies. This is a valuable resource for any educational leader who wishes to become a 'head learner.'" —Arthur L. Costa, Professor Emeritus California State University, Sacramento "Hord and Sommers create a powerful bridge between the research base on PLCs and practitioner knowledge and action. The book's dual focus on principles and 'rocks in the road' provide a grounded basis for school leaders. A dog-eared copy should be in every principal's office and in every professional developer's tool kit." —Karen Seashore Louis, Rodney S. Wallace Professor University of Minnesota, Minneapolis "The authors' rationale and suggestions will resonate because they come from experience and great insight. The bottom line remains steadfast for these two distinguished educators: you implement a PLC so that teachers learn and students achieve. This text will help educators reach toward that compelling vision." —Stephanie Hirsh, Executive Director National Staff Development Council Imagine all professionals in all schools engaged in continuous professional learning! Current research shows a strong positive relationship between successful professional learning communities and increased student achievement. In this practical and reader-friendly guide, education experts Shirley M. Hord and William A. Sommers explore the school-based learning opportunities offered to school professionals and the principal's critical role in the development of an effective professional learning community (PLC). This book provides school leaders with readily accessible information to guide them in developing a PLC that supports teachers and students. The authors cover building a vision for a PLC, implementing structures, creating policies and procedures, and developing the leadership skills required for initiating and sustaining a learning community. Each chapter includes meaningful quotes from the field, "rocks in the road" and ways to overcome them, examples from real PLCs, and learning activities to reinforce chapter content. The text illustrates how this research-based school improvement model can help educators: Increase leadership capacity Embed professional development into daily work Create a positive school culture Develop accountability Boost student achievement Discover how you can grow a vital community of professionals who work together to increase their effectiveness and strengthen the relationship between professional learning and student learning.

The Five Disciplines of PLC Leaders Harvard Education Press

Ensure your school district is doing the right work, the right way, for the right reasons. With this resource as your guide, you will learn how to align the work of every PLC team districtwide—from the boardroom to the classroom. Each chapter focuses on one of four types of teams and provides practices and tools for working together to foster a districtwide culture of continuous improvement. Use this resource to align your district's work in a top-down, bottom-up cyclical process: Learn the

leadership role the district office plays in supporting successful PLC at Work implementation and school-improvement efforts. Observe how collaborative teams at every level align their work districtwide to ensure high levels of learning in professional learning communities. Study real-life examples and artifacts of best practices in action. Receive protocols and templates, such as the Team Analysis of Common Assessment (TACA) form, to move student learning forward. Review a process for establishing a guaranteed and viable curriculum, and discover strategies for analyzing student learning and making data-informed decisions. Contents: Introduction Chapter 1: Starting at

the Top--The School Board and the Superintendent Team Chapter 2: Setting the Stage--The District-Level and Principal Teams Chapter 3: Effective Leadership Matters--The School-Level Principal and Grade-Level or Content Team Leaders Chapter 4: The Key to Improving Learning--Grade Level and Content Teams Chapter 5: Imagine This School District
