Vision is the sense by which we and other animals obtain most of our information about the world around us. Darwin appreciated that at first sight it seems absurd that the human eye could have evolved by natural selection. But we now know far more about vision, the many times it has independently evolved in nature, and the astonishing variety of ways to see. The human eye, with a lens forming an image on a sensitive retina, represents just one. Scallops, shrimps, and lobsters all use mirrors in different ways. Jumping spiders scan with their front-facing eyes to check whether the object in front is an insect to eat, another spider to mate with, or a predator to avoid. Mantis shrimps can even measure the polarization of light. Animal eyes are amazing structures, often involving precision optics and impressive information processing, mainly using wet protein - not the substance an engineer would choose for such tasks. In *Eyes to See*, Michael Land, one of the leading world experts on vision, explores the varied ways in which sight has evolved and is used in the natural world, and describes some of the ingenious experiments researchers have used to uncover its secrets. He also discusses human vision, including his experiments on how our eye movements help us to do everyday tasks, as well as skilled ones such as sight-reading music or driving. He ends by considering the fascinating problem of how the constantly shifting images from our eyes are converted in the brain into the steady and integrated conscious view of the world we experience. *A Handbook for Trainers, Coaches, Consultants and Leaders* Zeig Tucker & Theisen Publishers
If you have been daunted by complicated, esoteric herbal books in the past, *Healing with the Herbs of Life* offers clear and concise explanations of how and why herbs heal. It also provides step-by-step instructions for creating your own herbal remedies, therapeutic approaches you can use at home, and easy-to-follow guidelines for gathering, preparing, purchasing, and storing herbs. Previously published as *The Herbs of Life*, this completely revised and updated edition synthesizes the great herbal traditions of China and India with Western herbology to form a new kind of planetary herbal. Features a new chapter on treating specific conditions, expanded chapters in Materia Medica and the energy of food, and revised chapters on living with the seasons and home therapies. With new information on herbal safety and drug/herb interactions. The previous edition, *The Herbs of Life*, sold 45,000 copies.

Racialized Trauma and the Pathway to Mending Our Hearts and Bodies Ballantine Books

Chantal Nève-Hanquet and Agathe Crespel provide an accessible and ground-breaking guide to genuinely effective group work, sharing excellent hands-on assistance for coaches and facilitators. Offering a unique selection of guidelines and illustrations for group work, the authors demonstrate the benefits of using creative action methods in practice, helping leaders discover new ways to achieve dynamic group sessions and endowing their work with new vigour, as well as pleasure. *Facilitating Collective Intelligence* brings together a wealth of knowledge and techniques from psychodrama, Jungian and systemic analysis to inform group facilitation. Throughout the book's four parts, key inner attitudes, questions and action techniques are explored to help facilitators nourish open and flexible forms of communication within groups, stimulate collective intelligence and foster creative approaches to collective problem-solving. With the help of numerous sensitively related case studies, the book guides the reader through the process of achieving more dynamism in group work, fostering creativity, encouraging agility and developing co-construction within groups. It contains more than thirty practical reference sheets which provide an instant aid for implementing the methods and models in the book. Nève-Hanquet and Crespel's approach advocates the use of actions methods, specifically the ARC model, to encourage 'out of the box' thinking and develop new paths and strategies in working with teams and organizations. *Facilitating Collective Intelligence* is an invaluable and essential tool in cultivating effective group dynamics for all coaches, coach supervisors and consultants, both experienced and in training. Due to its clear and practical structure, it will also be useful for counsellors, coaching psychologists and other professionals who work with groups, as well as students and academics of coaching and coaching psychology.

Feelings Buried Alive Never Die Jessica Kingsley Publishers

A Group-Analytic Exploration of the Sibling Matrix: How Siblings Shape our Lives offers a fresh approach to siblings, recognising how these relationships are embedded in the framework of the family and how sibling experiences shape our lives, influencing relationships with partners, friends and colleagues, and affecting how we take our place in groups and in society. The book is divided into three parts. Part One focuses on the sibling life cycle, exploring how these relationships shift and change throughout life according to context and circumstances. In Part Two, Parker uses clinical examples to consider how therapists working with individuals and groups might expand their thinking to incorporate the sibling matrix. The final part investigates how the sibling matrix

manifests in organisational life and considers how we might develop mutuality and cooperation in our universal sibling matrix. Drawing on the author's wealth of experience as a clinician, the book incorporates compelling personal stories and clinical examples to bring to life the realities and nuances, the good and bad, the healthy and supportive, and also the potentially damaging aspects of sibling relationships. Accessibly written, this is a rich and rewarding invitation to reflect on our own experience, whether as clinicians, researchers or as members of our own sibling matrix.

THE NEW YORK TIMES BESTSELLER 'Insightful, thought-provoking and profound. I can't recommend highly enough' Sunny Singh 'A revolutionary work of beauty, brilliance, compassion and ultimately, hope' Robin DiAngelo The consequences of racism can be found in our bodies - in skin and sinew, in bone and blood. In this ground-breaking, inspiring work, therapist Resmaa Menakem examines the damage, the physical consequences of discrimination, from the perspective of body-centred psychology. He argues that until we learn to heal and overcome the generational anguish of white supremacy, we will all continue to bear its scars. *My Grandmother's Hands* is an extraordinary call to action for all of us to recognize that racism affects not only the mind, but also the body, and introduces an alternative view of what we can do to grow beyond our racial divides.

The Arena of Brazilian Psychodrama H J Kramer

Systemic Coaching and Constellations offers a refreshingly uncomplicated path into a potentially complex subject, demonstrating how to understand and manage intricate relationship systems as part of a powerful coaching agenda. It provides a comprehensive introduction to the principles that sustain systems, how to map and explore them through constellations, as well as a step-by-step guide to integrating these principles and practices into coaching. Featuring a variety of case studies from around the world to illustrate different facilitation styles and approaches, it also contains practical exercises which can be used in a variety of contexts, including one-to-one coaching, group coaching, leadership development coaching and managing conflict in teams. This updated third edition of *Systemic Coaching and Constellations* contains a new chapter on systemic supervision, new material on team coaching, systemic questions and resourcing constellations as well as new and refreshed case studies and updates to wider research and thinking. Whether used in an initial selection meeting or to underpin all coaching conversations and interventions, it remains an indispensable resource for coaches of all levels of experience and in all remits looking to transform their practice, as well as for those studying coaching as part of a degree or coaching qualification.

The prisoners in *I Carry Your Heart in My Heart* are serving long-term sentences for violent crimes, mostly life - without the possibility of parole - for murder. They represent society's ultimate outcasts, personifying evil brought to justice. Sharing Family Constellations with them is actually a great privilege. These men have gone through ordeals that we can only imagine and have worked to find a way to their souls. Systemic Family Constellations are unlike cognitive, behavioral, and interpersonal therapies in their origin, form, and purpose. Constellations succeed by diminishing the unconscious impulses that drive destructive behaviors. The process reaches the invisible clockworks of the mind and heart to reveal with astonishing specificity how individual problems nest within a larger tapestry shaped by ancestral family traumas. In a heartbeat, the patterns release, opening the mind to reverence for life and compassion for others. Problems that were frozen yield to new solutions. Dan Booth Cohen spent five years leading monthly Systemic Family Constellation circles with these prisoners. This book tells stories of these experiences. It also includes rigorously researched chapters that describe Family Constellations' historic roots and underlying philosophy.

Ranulph Fiennes tells the story of his unconventional, exceptional family, and reveals the ingredients for the man described by the Guinness Book of Records as 'the world's greatest living explorer'. Discover Sir Ranulph Twistelton-Wykhams-Fiennes's personal expedition to trace his extraordinary family through history. From Charlemagne - himself a direct ancestor of the author - to the count who very nearly persuaded William the Conqueror to retreat at Hastings, many members of this unique clan have lived close to the nerve centre of the ruler of their day. They number in their ranks a murderer, a wife poisoner, a poacher, England's greatest female traveller of the 17th century, and an extortionist Lord High Treasurer, teen cousins who eloped, a noble lord hanged for manslaughter, another hanged for adultery with the King's wife, and many who, as admirals or major-generals, won famous battles. The Fiennes' behind Cromwell provided the castle in which the Parliamentarians made their first secret moves, the same building in which twenty-one successive generations of the family have lived for 600 unbroken years . . . And that is just a taster. A whirlwind romp through the annals of time, peopled with the good, the bad and downright mad among the Fiennes clan. - Sunday Telegraph

J. L. Moreno wrote books, chapters and articles about psychodrama. His writing, like the method he pioneered, is rich and complex. Many students, practitioners and participants around the world have encountered Moreno's work in action; however, fewer people may have had the opportunity to read and think about the 'words of the father' due to the limited availability of key texts. A desire to ensure Moreno's work is available to the widest possible audience inspired members of the North West Psychodrama Association to work together to re-publish the books in this series. We hope by doing so J. L. Moreno's words will continue to reverberate across time and space: inspiring new generations of practitioners to be as creative and spontaneous as is possible whilst managing the

complexity of modern day practice.

Five hundred years of colonization have taken an incalculable toll on the Indigenous peoples of the Americas: substance use disorders and shockingly high rates of depression, diabetes, and other chronic health conditions brought on by genocide and colonial control. With passionate logic and chillingly clear prose, author and educator Suzanne Methot uses history, human development, and her own and others' stories to trace the roots of Indigenous cultural dislocation and community breakdown in an original and provocative examination of the long-term effects of colonization. But all is not lost. Methot also shows how we can come back from this with Indigenous ways of knowing lighting the way.

How Siblings Shape our Lives Llewellyn Worldwide

Mapping out a "family constellation," explains Dr. Joy Manné, encompasses exploring previous powerful life events from accidents to adoptions and accessing the deepest dynamics in that family system. This process helps us recognize and then resolve deeply seated family patterns. For example, in order to understand a person's inability to trust, the family history of betrayal must be uncovered and released. These insights replace resentment with respect, pain with understanding. Dr. Manné uses the knowledge gained from her own practice as well as her educational experiences with Bert Hellinger, the founder of Family Constellations therapy, to clearly describe this technique. Most family constellation sessions are carried out in a group setting, with the facilitator first seeking clarity regarding the issue or problem the client has come to work out. Representatives are then chosen from among the group and the constellation is set up and worked in until it comes to resolution. This may be followed by a closing ritual and advice about how to integrate what the constellation has revealed. Through the use of real-life examples of family constellations, Dr. Manné makes this increasingly popular practice understandable and relatable.

The Ancestor Syndrome Anchor

The object of clinical psychogenealogy is to claim our own personal and family history, to fit into a lineage, and bring order to the legacy of our ancestors. In this work, Anne Ancelin Schotzenberger shows us the keys to invisible family loyalties and the traps we should not fall into.

The Child and the Family Routledge

Karol Truman provides a comprehensive and enlightening resource for getting in touch with unresolved feelings which, she explains, can distort not only happiness but also health and well-being. Leaving no emotion unnamed, and in fact listing around 750 labels for feelings, Truman helps identify problem areas, and offers a "script" to help process the feelings, replacing the negative feeling with a new, positive outlook. A chapter on the possible emotions below the surface in various physical ailments gives the reader plenty to work with on a deep healing level. FEELINGS BURIED ALIVE NEVER DIE combines a supportive, common-sense, results-oriented approach to a problem that is widespread and that can stop people from living fully.

Keating on Construction Contracts Kogan Page Publishers

An acclaimed writer goes searching for the truth about her wildly unconventional Southern family—and finds that our obsession with ancestors opens up new ways of seeing ourselves. "A roadmap for all of us who long to understand, at the deepest level, where we come from."—Dani Shapiro, author of *Inheritance* ONE OF THE MOST ANTICIPATED BOOKS OF 2022—Oprah Daily, Time, Esquire, The Millions, The Week, Thrillist, She Reads, Lit Hub, BookPage Maud Newton's ancestors have vexed and fascinated her since she was a girl. Her mother's father, who came of age in Texas during the Great Depression, was said to have married thirteen times and been shot by one of his wives. Her mother's grandfather killed a man with a hay hook and died in an institution. Mental illness and religious fanaticism percolated through Maud's maternal lines back to an ancestor accused of being a witch in Puritan-era Massachusetts. Maud's father, an aerospace engineer turned lawyer, was an educated man who extolled the virtues of slavery and obsessed over the "purity" of his family bloodline, which he traced back to the Revolutionary War. He tried in vain to control Maud's mother, a whirlwind of charisma and passion given to feverish projects: thirty rescue cats, and a church in the family's living room where she performed exorcisms. Her parents' divorce, when it came, was a relief. Still, her position at the intersection of her family bloodlines inspired in Newton inspired an anxiety that she could not shake, a fear that she would replicate their damage. She saw similar anxieties in the lives of friends, in the works of writers and artists she admired. As obsessive in her own way as her parents, Newton researched her genealogy—her grandfather's marriages, the accused witch, her ancestors' roles in slavery and genocide—and sought family secrets through her DNA. But immersed in census archives and cousin matches, she yearned for deeper truths. Her journey took her into the realms of genetics, epigenetics, and the debates over intergenerational trauma. She mulled over modernity's dismissal of ancestors along with psychoanalytic and spiritual traditions that center them. Searching, moving, and inspiring, *Ancestor Trouble* is one writer's attempt to use genealogy—a once-niche hobby that has grown into a multi-billion-dollar industry—to

expose the secrets and contradictions of her own ancestors, and to argue for the transformational possibilities that reckoning with our ancestors offers all of us.

Oxford University Press

In a world where natural, social and political disasters are a daily reality, the therapist is increasingly called upon to find rapid and effective methods of treating the survivors of trauma, including sexual abuse, torture, war-related trauma, addiction, depression and bereavement. The contributors to this book provide persuasive evidence of how psychodrama can safely be used to create paths of change for even the most severe traumatization and they also discuss the possible transmission of trauma

patterns across generations. Research following World War II, neurobiological studies and other recent research into PTSD has shown that many trauma symptoms are unconscious, non-verbal, right-brained experiences which cannot be accessed through talk therapy. Psychodrama creates a place to act out unprocessed trauma within the containment of therapy, in order to stop the obsessive repetition of the past. Psychodrama with Trauma Survivors documents the impact of trauma and explores the development of treatment, providing integrated models of experiential treatment for clinicians to use. It is an invaluable resource for those interested in psychodrama and those working with trauma survivors.
