Teaching What Really Happened

Kabir Khan is a very confident Muslim guy, while Geet Kaur is a shy Sardarni. Both of them are delhiites and study in the same college. Kabir performs for the crowd, while Geet is from the crowd. Both are opposite poles! Well they have one thing in common which is to follow their passion. Both of them dare to dream. Their

relationship is not something we get to see often; life has many unexpected turns planned for them. There will be many obstacles for them to cross to pursue their dreams. Life is not easy but teaches us many lessons. Nobody gets everything in life, we always miss out something. Kabir falls several times. Geet never falls but her achievement stays incomplete. Life gives them many surprises, but they manage to move with it. Just when it's all pink for them suddenly their life starts turning blue. Will this blue ever turn to pink again? At least for either of them? Pinks and Blues is a life story very easy to connect

with, which will leave you motivated in the end. Kabir Khan is a very confident Muslim guy, while Geet Kaur is a shy Sardarni. Both of them are delhiites and study in the same college. Between 1939 and 1942, one of America's leading universities recruited 268 of its healthiest and most promising undergraduates to participate in a revolutionary new study of the human life cycle. The originators of the program, which came to be known as the Grant Study, felt that medical research was too heavily weighted in the direction of disease, and their intent was to chart the ways in which a group of promising individuals coped with their lives over the course of many years. Nearly forty years later, George E. Vaillant, director of the Study, took the measure of the Grant

Study men. The result was the compelling, provocative classic, *Adaptation to Life*, which poses fundamental questions about the individual differences in confronting life's stresses. Why do some of us cope so well with the portion life offers us, while others, who have had similar advantages (or disadvantages), cope badly or not at all? Are there ways we can effectively alter those patterns of behavior that make us unhappy, unhealthy, and unwise? George Vaillant discusses these and other questions in terms of a clearly defined scheme of "adaptive mechanisms" that are rated mature, neurotic, immature, or psychotic, and illustrates, with case histories, each method of coping.

In the late 19th century, modern psychology emerged as a discipline, shaking off metaphysical notions of the soul in favor of a more scientific, neurophysiological concept of the mind.

Laboratories began to introduce instruments and procedures which examined bodily markers of psychological experiences, like muscle contractions and changes in vital signs. Along with these changes in the scientific realm came a newfound interest in physiological psychology within the arts - particularly with the new perception of artwork as stimuli, able to induce specific affective experiences. In *Psychomotor Aesthetics*, author Ana Hedberg Olenina explores the effects of physiological psychology on art at the turn of the 20th century. The book explores its influence on not only art scholars and theorists, wishing to understand the relationship between artistic experience and the internal processes of the mind, but also cultural producers more widely. Actors incorporated psychology into their film acting techniques, the Russian and American film industries started to evaluate audience members' physical reactions, and literary scholars began investigations into poets' and performers' articulation. Yet also looming over this newly emergent field were commercial advertisers and politicians, eager to use

psychology to further their own mass appeal and assert control over audiences. Drawing from archival documents and a variety of cross-disciplinary sources, Psychomotor Aesthetics calls attention to the cultural resonance of theories behind emotional and cognitive experience - theories with implications for today's neuroaesthetics and neuromarketing.

The political events of "annus mirabilis" 1989 marked a rare turning point in world history, but the significance of the year for German literary history is unique. As the 40-year-old German Democratic Republic ceased to exist, so too did the special circumstances which had fostered a literature separate from and in competition with that of the Federal Republic of Germany. A new period of literary history was delimited almost overnight: Germany Democratic Republic literature now was something to be examined as a whole, cultural movement. At the same time, the literary traditions of the German Democratic Republic have continued to influence the contemporary cultural scene, often in ways that are only gradually becoming clear. The essays, memoirs, and plays collected in this special issue of Contemporary Theatre Review represent an early attempt to assess and reassess one of the German Democratic Republic's richest cultural domains: its theatre.
