The Power of Passion and Perseverance Strange Object
 “This book is a breakthrough. It’s beautifully written, perfectly timed and heralds a new way forward. I’m buying a dozen copies to share with friends and colleagues.” -Seth Godin, Founder of altMBA and author of *The Practice* If you let go of hierarchy, chaos will reign...or so many leaders believe. But when leaders find the courage to distribute rather than hoard power, creativity multiplies, trust deepens, and inclusivity expands... and a new kind of order emerges. A few rare leaders have learned to embrace a new organizational shape and mindset: Constellations. Organizations designed as constellations are dynamic and flexible networks of distinct yet interwoven individuals. Each member of the team feels like a singular star and is also connected to others to form something greater. That is how Visa reimagined how we pay for things, how Wikipedia beat the richest company in the world and how Barack Obama and his grassroots team revolutionized political campaigning. These leaders did what most leaders dread - they gave away power. Barzun brilliantly layers lessons across history and industries with his own experiences as an internet entrepreneur, political organizer, and US ambassador to the United Kingdom and Sweden. *The Power of Giving* Away Power shows how the Constellation mindset shines in some of the most impactful organizations and innovations the world has ever known. And it encourages us all to recognize, as Barzun writes, “the power we can create by seeing the power in others” — and making the leap to lead. Together.
Conquering the Disease of Fear Harper Collins
 Against the Modern World is the first history of Traditionalism, an important yet surprisingly little-known twentieth-century anti-modern movement. Comprising a number of often secret but sometimes very influential religious groups in the West and in the Islamic world, it affected mainstream and radical politics in Europe and the development of the field of religious studies in the United States, touching the lives of many individuals. French writer Rene Guenon rejected modernity as a dark age and sought to reconstruct the Perennial Philosophy - the central truths behind all the major world religions. Guenon stressed the urgent need for the West's remaining spiritual and intellectual elite to find personal and collective salvation in the surviving vestiges of ancient religious traditions. A number of disenchanted intellectuals responded to his call. In Europe, America, and the Islamic world, Traditionalists founded institutes, Sufi brotherhoods, Masonic lodges, and secret societies. Some attempted unsuccessfully to guide Fascism and Nazism along Traditionalist lines; others later participated in political terror in Italy. Traditionalist ideas were the ideological cement for the

alliance of anti-democratic forces in post-Soviet Russia, and in the Islamic world entered the debate about the relationship between Islam and modernity. Although its appeal in the West was ultimately limited, Traditionalism has wielded enormous influence in religious studies, through the work of such Traditionalists as Ananda Coomaraswamy, Huston Smith, Mircea Eliade, and Seyyed Hossein Nasr.

 How Giving Back Enriches Us All

 Here, from Bill Clinton, is a call to action. Giving is an inspiring look at how each of us can change the world. First, it reveals the extraordinary and innovative efforts now being made by companies and organizations—and by individuals—to solve problems and save lives both “down the street and around the world.” Then it urges us to seek out what each of us, “regardless of income, available time, age, and skills,” can do to help, to give people a chance to live out their dreams. Bill Clinton shares his own experiences and those of other givers, representing a global flood tide of nongovernmental, nonprofit activity. These remarkable stories demonstrate that gifts of time, skills, things, and ideas are as important and effective as contributions of money. From Bill and Melinda Gates to a six-year-old California girl named McKenzie Steiner, who organized and supervised drives to clean up the beach in her community, Clinton introduces us to both well-known and unknown heroes of giving. Among them: Dr. Paul Farmer, who grew up living in the family bus in a trailer park, vowed to devote his life to giving high-quality medical care to the poor and has built innovative public health-care clinics first in Haiti and then in Rwanda; a New York couple, in Africa for a wedding, who visited several schools in Zimbabwe and were appalled by the absence of textbooks and school supplies. They founded their own organization to gather and ship materials to thirty-five schools. After three years, the percentage of seventh-graders who pass reading tests increased from 5 percent to 60 percent; Oseola McCarty, who after seventy-five years of eking

out a living by washing and ironing, gave \$150,000 to the University of Southern Mississippi to endow a scholarship fund for African-American students; Andre Agassi, who has created a college preparatory academy in the Las Vegas neighborhood with the city’s highest percentage of at-risk kids. “Tennis was a stepping-stone for me,” says Agassi. “Changing a child’s life is what I always wanted to do”; Heifer International, which gave twelve goats to a Ugandan village. Within a year, Beatrice Biira’s mother had earned enough money selling goat’s milk to pay Beatrice’s school fees and eventually to send all her children to school—and, as required, to pass on a baby goat to another family, thus multiplying the impact of the gift. Clinton writes about men and women who traded in their corporate careers, and the fulfillment they now experience through giving. He writes about energy-efficient practices, about progressive companies going green, about promoting fair wages and decent working conditions around the world. He shows us how one of the most important ways of giving can be an effort to change, improve, or protect a government policy. He outlines what we as individuals can do, the steps we can take, how much we should consider giving, and why our giving is so important. Bill Clinton’s own actions in his post-presidential years have had an enormous impact on the lives of millions. Through his foundation and his work in the aftermath of the Asian tsunami and Hurricane Katrina, he has become an international spokesperson and model for the power of giving. “We all have the capacity to do great things,” President Clinton says. “My hope is that the people and stories in this book will lift spirits, touch hearts, and demonstrate that citizen activism and service can be a powerful agent of change in the world.”

The troubling ethics and politics of philanthropy Is philanthropy, by its very nature, a threat to today’s democracy? Though we may laud wealthy individuals who give away their money for society’s benefit, *Just Giving* shows how such generosity not only isn’t the unassailable good we think it to be but might also undermine democratic values. Big philanthropy is often an exercise of power, the conversion of private assets into public influence. And it is a form of power that is largely unaccountable and lavishly tax-advantaged. Philanthropy currently fails democracy, but Rob Reich argues that it can be redeemed. *Just Giving* investigates the ethical and political dimensions of philanthropy and considers how giving might better support democratic values and promote justice.

2016 Books For A Better Life Award winner Drawing on the latest research and remarkable tales of forgiveness from around the world, journalist Megan Feldman explores how forgiveness, when practiced in the right ways, can save lives, make us happier and healthier, and lead to a better world. Veteran journalist Megan

Feldman was still smarting over a bitter breakup when she began working on a feature article about a father named Azim who had truly forgiven the man who killed his son. She had found herself totally and completely unable to forgive her ex-boyfriend, and yet Azim had managed to forgive his own son's murderer. Forgiveness has long been touted by religious leaders as a moral imperative. But Megan wanted to know exactly what it means from a scientific perspective, and why forgiving those who have wronged you is one of the best things you can do for yourself. In *Triumph of the Heart*, Feldman embarks on a quest to understand this complex idea, drawing on the latest research showing that forgiveness can provide a range of health benefits, from relieving depression to decreasing high blood pressure. The journey takes her from New Zealand and the Maori who practice their own form of restorative justice, to a principal in Baltimore who uses forgiveness techniques to eradicate violence in her school, and to recovered addicts who restarted their lives by seeking and receiving forgiveness. She travels to Rwanda to learn about forgiveness in the face of unthinkable atrocities. This book is a guide for how the practice of forgiveness can help us all in our search for a satisfying, fulfilling, good life.

'Go, kiss the world' were Subroto Bagchi's blind mother's last words to him. These words became the guiding principle of his life. Subroto Bagchi grew up amidst what he calls the 'material simplicity' of rural and small-town Orissa, imbibing from his family a sense of contentment, constant wonder, connectedness to a larger whole and learning from unusual sources. From humble beginnings, he went on to achieve extraordinary professional success, eventually co-founding MindTree, one of India's most admired software services companies. Through personal anecdotes and simple words of wisdom, Subroto Bagchi brings to the young professional lessons in working and living, energizing ordinary people to lead extraordinary lives. *Go Kiss the World* will be an inspiration to 'young India', and to those who come from small-town India, urging them to recognize and develop their inner strengths, thereby helping them realize their own, unique potential.

A middle grade novel in verse about Samira, an eleven-year-old Rohingya refugee living in Cox's Bazar, Bangladesh, who finds strength and sisterhood in a local surf club for girls. Samira thinks of her life as before and after: before the burning and violence in her village in Burma, when she and her best friend would play in the fields, and after, when her family was forced to flee. There's before the uncertain journey to Bangladesh by river, and after, when the river swallowed her nana and nani whole. And now, months after rebuilding a life in Bangladesh with her mama, baba, and brother, there's before Samira saw the Bengali surfer girls of Cox's Bazar, and after, when she decides she'll become one. *Samira Surfs*, written by Rukhsanna Guidroz with illustrations by Fahmida Azim, is a tender novel in verse about a young Rohingya girl's journey from isolation and persecution to sisterhood, and from fear to power.

Once in a blue moon an idea comes along that once heard seems so obvious that you wonder why somebody hasn't written about it before. Amanda Owen's *The Power of Receiving: A Revolutionary Approach to Giving Yourself the Life You Want and Deserve* presents a new paradigm for the 21st century—a philosophy that values receiving as much as giving and demonstrates that giving is enhanced when receiving is embraced. With the formula: Believe + Receive = Achieve, *The Power of Receiving* presents a wholly original yet easily accessible road map for people to follow, showing readers how to restore balance to their over-extended lives and attract the life they desire and deserve. Inspiring stories are featured about people who have experienced life-altering results after becoming skilled Receivers, including Ken who regained his hearing after a devastating hearing-loss, Julie who met the man she would later marry, and Don who received an extra \$1,000 a month in his pay check. Based on over twenty years of research into the nature of receptivity and its link to manifestation, *The Power of Receiving* offers a unique vision for anyone seeking to create greater reciprocity in their relationships and more harmony and abundance in their lives.

Business, Balance & Beyond Penguin

"The Queue ... has drawn comparisons to Western classics like George Orwell's *1984* and *The Trial* by Franz Kafka. It represents a new wave of dystopian and surrealist fiction from Middle Eastern writers who are grappling with the chaotic aftermath and stinging disappointments of the Arab Spring." -- *The New York Times* Winner of the English PEN Translation Award In a surreal, but familiar, vision of modern day Egypt, a centralized authority known as 'the Gate' has risen to power in the aftermath of the 'Disgraceful Events,' a failed popular uprising. Citizens are required to obtain permission from the Gate in order to take care

of even the most basic of their daily affairs, yet the Gate never opens, and the queue in front of it grows longer. Citizens from all walks of life mix and wait in the sun: a revolutionary journalist, a sheikh, a poor woman concerned for her daughter's health, and even the brother of a security officer killed in clashes with protestors. Among them is Yehia, a man who was shot during the Events and is waiting for permission from the Gate to remove a bullet that remains lodged in his pelvis. Yehia's health steadily declines, yet at every turn, officials refuse to assist him, actively denying the very existence of the bullet. Ultimately it is Tarek, the principled doctor tending to Yehia's case, who must decide whether to follow protocol as he has always done, or to disobey the law and risk his career to operate on Yehia and save his life. Written with dark, subtle humor, *The Queue* describes the sinister nature of authoritarianism, and illuminates the way that absolute authority manipulates information, mobilizes others in service to it, and fails to uphold the rights of even those faithful to it.

In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls "grit." "Inspiration for non-genius everywhere" (People). The daughter of a scientist who frequently noted her lack of "genius," Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In *Grit*, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she's learned from interviewing dozens of high achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. "Duckworth's ideas about the cultivation of tenacity have clearly changed some lives for the better" (The New York Times Book Review). Among *Grit*'s most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, *Grit* is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is "a fascinating tour of the psychological research on success" (The Wall Street Journal).

Stories and Science Behind the Life-Changing Power of Giving Jeremy P. Tarcher

A bold exploration and call-to-arms over the widening gap between AI, automation, and big data—and our ability to deal with its effects We are living in the first exponential age. High-tech innovations are created at dazzling speeds; technological forces we barely understand remake our homes and workplaces; centuries-old tenets of politics and economics are upturned by new technologies. It all points to a world that is getting faster at a dizzying pace. Azeem Azhar, renowned technology analyst and host of the *Exponential View* podcast, offers a revelatory new model for understanding how technology is evolving so fast, and why it fundamentally alters the world. He roots his analysis in the idea of an "exponential gap" in which technological developments rapidly outpace our society's ability to catch up. Azhar shows that this divide explains many problems of our time—from political polarization to ballooning inequality to unchecked corporate power. With stunning clarity of vision, he delves into how the exponential gap is a near-inevitable consequence of the rise of AI, automation, and other exponential technologies, like renewable energy, 3D printing, and synthetic biology, which loom over the horizon. And he offers a set of policy solutions that can prevent the growing exponential gap from fragmenting, weakening, or even destroying our societies. The result is a wholly new way to think about technology, one that will transform our understanding of the economy, politics, and the future.
