Should we allow performance-enhancing substances in competitive athletics? The first book of its kind, Well Played answers this question by urging us to a deeper appreciation for the purpose of sport. Giving special reference to performance-enhancing substances, Shafer challenges the

incompleteness of the ethical arguments and contributes a Christian voice to the discussion. He initiates a theological conversation that is both scholarly and accessible, arguing that a distinctively Christian understanding of sport will have far-reaching implications for how we treat ethical issues like doping. The values, beliefs, and practices within the Christian tradition show an alternative that prioritizes humility and friendship, grace and gratitude over the "win at all costs" mentality that drives the use of performance-enhancing substances for a competitive advantage. This groundbreaking book ventures into new theological territory as it explores the intersections of theology, philosophy of sport, and the ethics of doping. Theologians, ethicists, and pastors, as well as coaches, athletes, and sports fans will benefit from this book's thoughtful reflection on how Christians can play well in the modern sports culture.

"Grounded in the field of adult education, this international compilation offers a range of critical perspectives on popular culture as a form of pedagogy. Its fundamental premise is that adults learn in multiple ways, including through their consumption of fiction. As scholars have asserted for decades, people are not passive consumers of media; rather, we (re)make our own meanings as we accept, resist, and challenge cultural representations. At a time when attention often turns to new media, the contributors to this collection continue to find "old" forms of popular culture important and worthy of study. Television and movies – the emphases in this book – reflect aspects of consumers' lives, and can be powerful vehicles for helping adults see, experience, and inhabit the world in new and different ways. This volume moves beyond conceptually oriented scholarship, taking a decidedly research-oriented focus. It offers examples of textual and discursive analyses of television shows and films that portray varied contexts of adult learning, and suggests how participants can be brought into adult education research in this area. In so doing, it provides compelling evidence about the complexity, politics, and multidimensionality of adult teaching and learning. Using a range of television shows and movies as exemplars, chapters relate popular culture to globalization, identity, health and health care, and education. The book will be of great

use to instructors, students, and researchers located in adult education, cultural studies, women's and gender studies, cultural sociology, and other fields who are looking for innovative ways to explore social life as experienced and imagined."

The book aims to outline the progress, problems and challenges of delivering a safe and secure Olympics in the context of the contemporary serious and enduring terrorist threat. The enormous media profile and symbolic significance of the Olympic Games, the history of terrorists aiming to use such high-profile events to advance their cause, and Al Qaeda's aim to cause mass casualties, all have major implications for the security of London 2012. Drawing on contributions from leading academics and practitioners in the field the book will assess the current terrorist threat, particularly focusing on terrorist targeting and how the Olympics might feature in this, before addressing particular response themes such as transport security, the role of surveillance, resilient designing of Olympic sites, the role of private security, and the challenge of inter-agency coordination. The book will conclude by providing an assessment of the legacy of Olympic security to date and will discuss the anticipated issues and dilemmas of the future. This book will be of interest to students of terrorism studies, security studies, counter-terrorism and sports studies. *Terrorism and the Olympics* "O'Reilly Media, Inc."

It is widely believed that the practice of ancient Egyptian religion ceased with the end of pharaonic culture and the rise of Christianity. However, an organised reconstruction and revival of the authentic practice of Egyptian, or Kemetite religion has been growing, almost undocumented, for nearly three decades. *Profane Egyptologists* is the first in-depth study of the now-global phenomenon of Kemetism. Presenting key players in their own words, the book utilises extensive interviews to reveal a continuum of beliefs and practices spanning eight years of community growth. The existence of competing visions of Egypt, which employ ancient material and academic resources, questions the position of Egyptology as a gatekeeper of Egypt's past. Exploring these boundaries, the book highlights the politicised and economic factors driving the discipline's self-conception. Could an historically self-imposed insular nature have harmed Egyptology as a field, and how could inclusive discussion help guard against further isolationism? *Profane Egyptologists* is both an Egyptological study of Kemetism, and a critical study of the discipline of Egyptology itself. It will be of value to scholars and students of archaeology and Egyptology, cultural heritage, religion online, phenomenology, epistemology, pagan studies and ethnography, as well as Kemetics and devotees of Egyptian culture.

*Popular Culture as Pedagogy* Rand Corporation

What does it mean to engage in Deaf Studies and who gets to define the field? What would a truly deaf-led Deaf Studies research program look like? What are the research practices of deaf scholars in Deaf Studies, and how do they relate to deaf research participants and communities? What innovations do deaf scholars deem necessary in the field of Deaf Studies? In *Innovations in Deaf Studies: The Role of Deaf Scholars*, volume editors Annelies Kusters, Maartje De Meulder, and Dai O'Brien and their contributing authors tackle these questions and more. Spurred by a gradual increase in the number of Deaf Studies scholars who are deaf, and by new theoretical trends in Deaf Studies, this book creates an important space for contributions from deaf researchers, to see what happens when they enter into the conversation. Innovations in Deaf Studies expertly foregrounds deaf ontologies (defined as "deaf ways of being") and how the experience of being deaf is central not only to deaf research participants' own ontologies, but also to the positionality and framework of the study as a whole. Further, this book demonstrates that the research and methodology built around those ontologies offer suggestions for new ways for the discipline to meet the challenges of the present, which includes productive and ongoing collaboration with hearing researchers. Providing fascinating perspective and insight, Kusters, De Meulder, O'Brien, and their contributors all focus on the underdeveloped strands within Deaf Studies, particularly on areas around deaf people's communities, ideologies, literature, religion, language practices, and political aspirations.

Every year around three-quarters of a million people die (directly or indirectly) as a result of gun violence, with most deaths occurring in the poorest, yet also most highly weaponized parts of the world. Firearm proliferation -- 875 million global firearms -- is a direct contributor to both regional conflicts and to crime. This book attempts to understand the inter-related dynamics of supply and demand which are weaponizing the world. Now over ten years after Peter Squires's *Gun Culture or Gun Control?*, the issues pertaining to gun violence and gun control have developed dramatically. With *Gun Crime in Global Contexts*, Peter Squires offers a cutting-edge account of contemporary developments in the politics of gun crime and the social and theoretical issues that surround the problem. This book contains: an innovative political analysis of neo-liberal globalization and weapon proliferation; an overview of recent gun control debates and gang strategies in the UK; an updated analysis of US gun politics: self-defence, race and the 'culture war'; a critical analysis of US school and rampage shootings, how they have impacted the gun debate and how different societies have responded to mass shootings; an examination of the UN's development of an Arms Trade Treaty (2001--13); a discussion of weapon trafficking; discussions about youth gangs around the world, including those in Brazil, Kenya, West Africa, Mexico and South Africa. With its interdisciplinary perspective and global reach, this book will be important reading for academics and students interested in youth and gang crime, violent crime and comparative criminal justice, as well as peace and security studies and international relations.
