 course and the second half of the book - stressing code optimization - in a second course at the graduate or mezzanine level. Here is an outline of the chapters: Chapter 1 contains motivational material and also presents some background issues in

computer architecture and programming-language principles.
Compilers - Principles, Techniques, and Tools
Compilers: Principles, Techniques, and Tools is a computer science textbook by Alfred V. Aho, Monica S. Lam, Ravi Sethi, and Jeffrey D. Ullman about compiler construction. First published in 1986, it is widely regarded as the classic definitive compiler technology text.. It is affectionately known as the Dragon Book to generations of computer scientists as its cover depicts a knight and a ...
